

Identity Management for academics

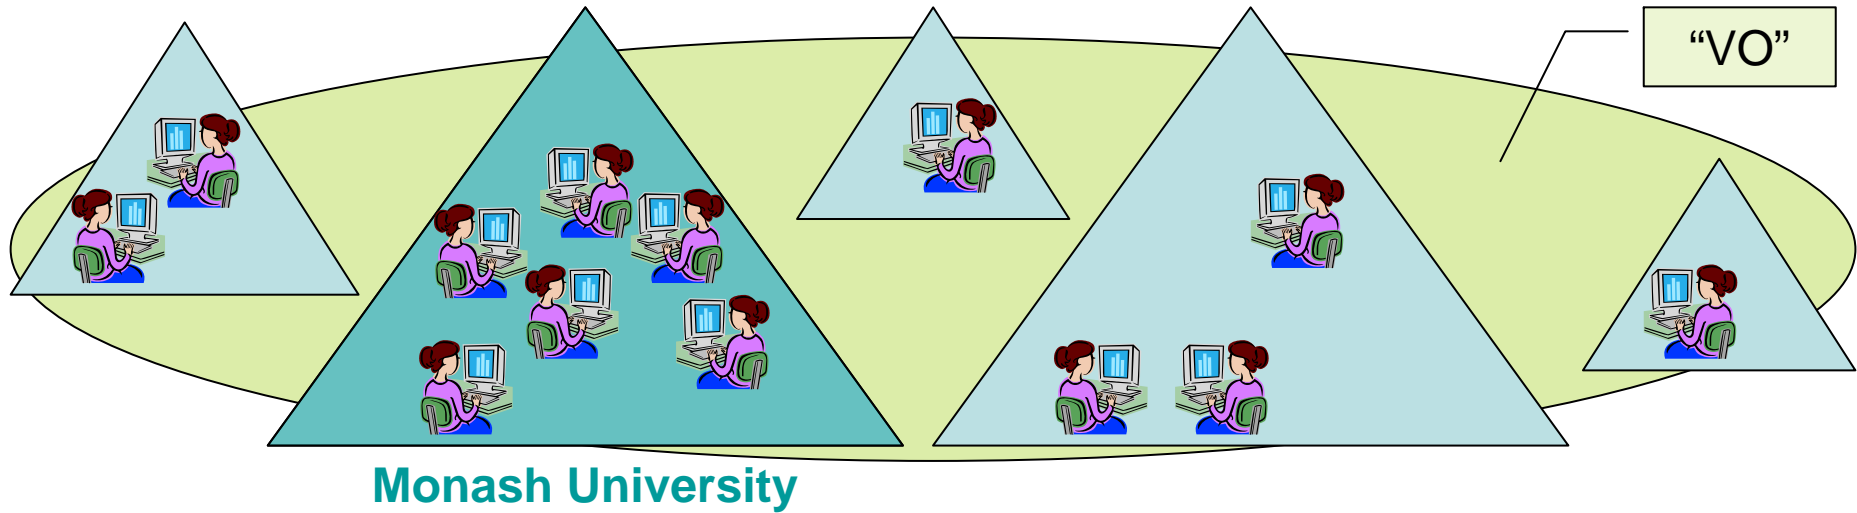

- Conventional “Enterprise-class” identity management treats people outside Monash as outsiders

Identity Management for academics

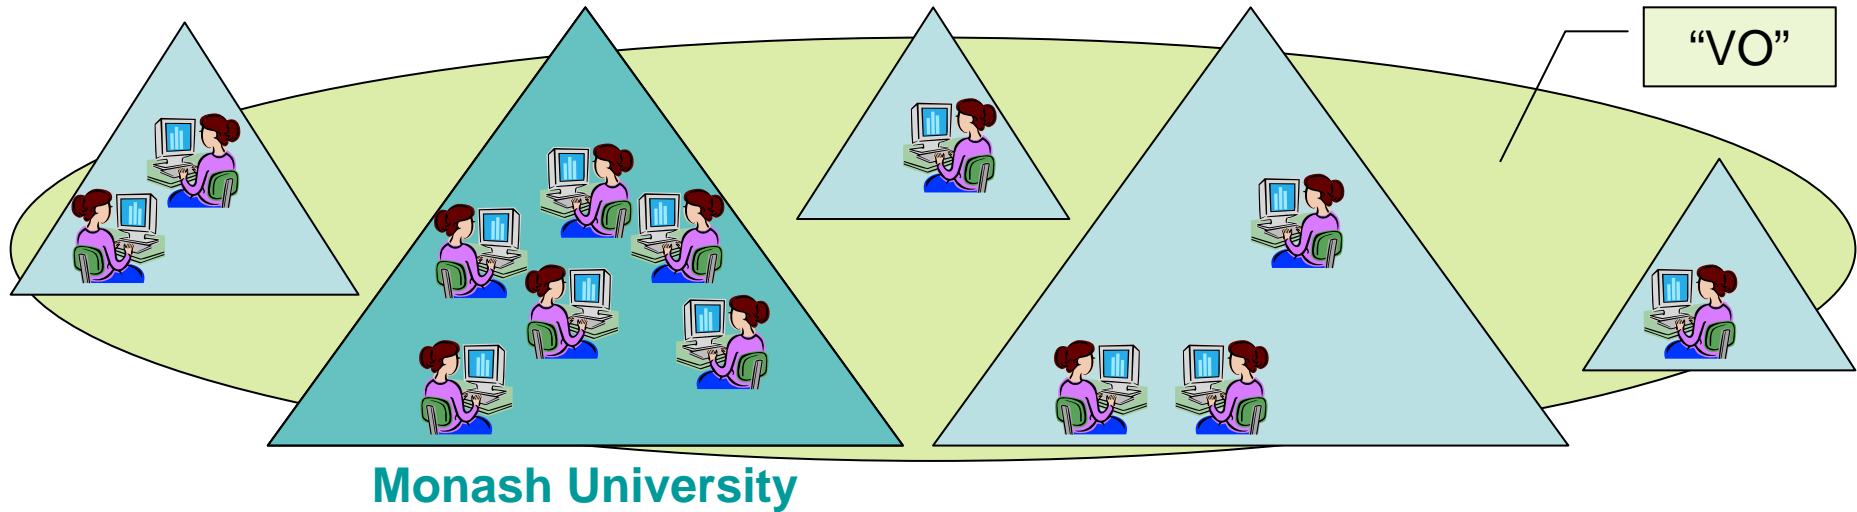

- Conventional “Enterprise-class” identity management treats people outside Monash as outsiders
- “Federated” Identity Management brings everyone together = the promise of the AAF (Australian Access Federation)

Identity Management for academics

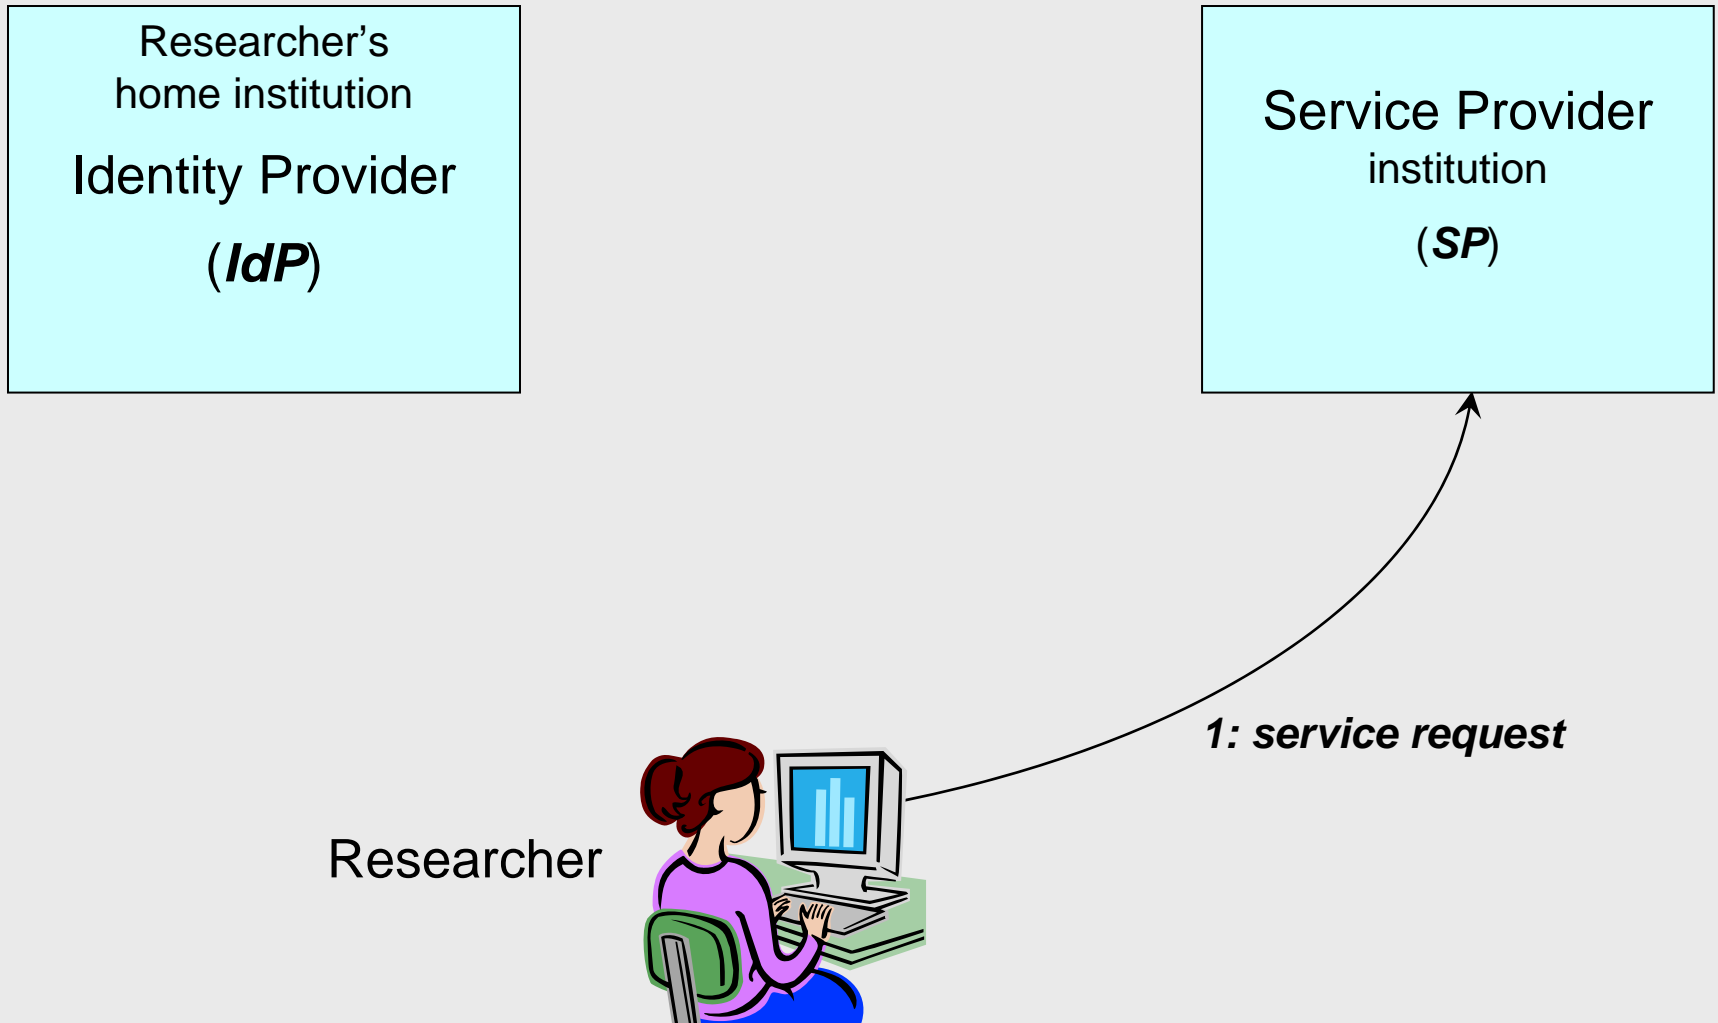

- Conventional “Enterprise-class” identity management treats people outside Monash as outsiders
- “Federated” Identity Management brings everyone together = the promise of the AAF (Australian Access Federation)
- Builds a distributed research team into a “Virtual Organization”

Identity Management for academics

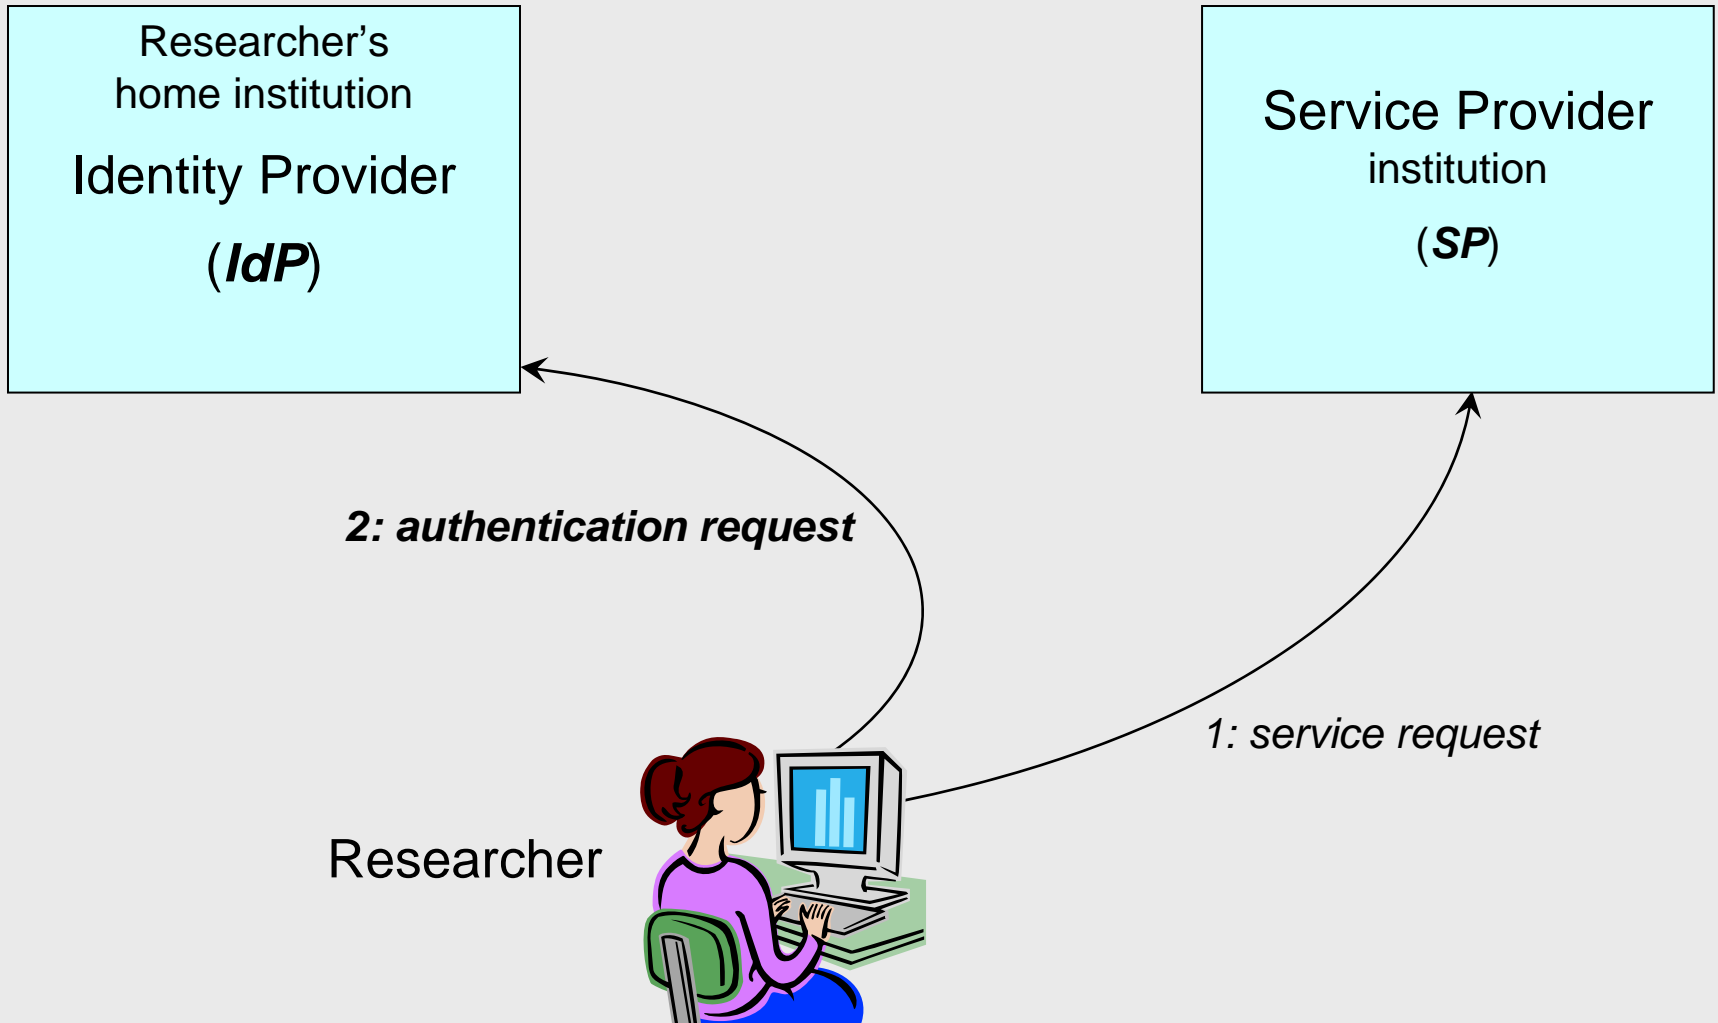

- “Federated” Identity Management brings everyone together
- Benefits for academics across all disciplines:
 - Treat **HDRs** as for staff – i.e. as for other early career academics
 - Research teams **distributed** across multiple institutions:
 - IT tools for distributed workgroup **collaboration**
 - Access to the private/unpublished/shared **data** of the research team
 - Academics on **sabbatical** can continue to fully participate with their research teams; supervise junior academics/RAs; etc.
 - **Visiting** academics can access both Monash and home facilities
 - No need to manually register in lots of separate systems
