

## **Seminar Outline: Australian National Data Service (ANDS) Establishment**

A Commonwealth Government initiative which aims to inform on policies and best practice for research data management, storage and curation.

### **Biography: Dr Andrew Treloar**

Dr Andrew Treloar [<http://andrew.treloar.net/>] has a B. A. hons. (first class), majoring in Germanic Languages and Linguistics, a Grad. Dip. in computer science, and an M. A. with the topic *A Computer-assisted analysis of characterisation in Virginia Woolf's 'The Waves'*, all from Melbourne University. In 1999 he received his Ph. D. from Monash University with the topic *Hypermedia Online Publishing - Transformation of the Scholarly Journal*.

He is currently the Director of the project to establish the Australian National Data Service (<http://ands.org.au/>).

Previously he was the Director and Chief Architect of the ARCHER [<http://archer.edu.au/>] project and the ARROW [<http://arrow.edu.au/>] Technical Architect and DART [<http://dart.edu.au/>] Project Architect. He has also held a number of management roles within ITS in the Web and Internet technologies area. Most significant of these was as Director, Information Management and Strategic Planning within Information Technology Services at Monash University. A major part of this role involved implementing the Monash University Information Management Strategy [<http://www.monash.edu.au/staff/information-management/>].

For much of his career he was an IT academic, most recently as a Senior Lecturer in Information Management at Deakin University. He has taught extensively in the areas of the Internet, database management, project management and electronic information sources. He has also consulted in Australia, Papua New Guinea, the Philippines, South Korea and Fiji.

His research interests include data management, institutional repositories and scholarly communication.
