

**e-Research Seminar – Steven Young, National Grid Service Manager,
Oxford e-Research Centre,
The UK National Grid Service: Overview and recent developments**

Date: Tuesday, 16th December

Time: 10.00am – 11.00am (Coffee from 9.45am)

Where: Conference Room, Level 1, Matheson Library, Clayton campus

The UK NGS aims to provide coherent electronic access for UK researchers to all computational and data based resources and facilities required to carry out their research, independent of resource or researcher location.

Since 2004 the UK NGS has provided a production quality e-infrastructure for the UK by providing policy and best practice framework for operation and sharing of research computing services across the UK.

This talk will provide an overview of the UK NGS as well as discuss some recent developments within the NGS, including a new version of the NGS Software Stack and Shibboleth access to resources on the NGS.

Steven Young is the National Grid Service Manager. He manages the Oxford contribution to the UK National Grid Service which provides a grid computing and data service to researchers across the UK.

We hope to see you on Tuesday 16 December,
Anthony Beitz, Technical Manager
Monash e-Research Centre
