Administration and Analysis

The survey was administered online following the Semester 1 orientation, which ran from Monday, 18 February to Friday, 22 February. Of the 2682 Faculty of Medicine, Nursing, and Health Sciences students eligible to participate in this survey, 376 completed and submitted online responses, resulting in an overall response rate of 14%.

This report covers the student responses from the Faculty of Medicine, Nursing, and Health Sciences orientation experience, with breakdowns by campus for items 13-17. Responses from campuses, Faculties and international students are tabled as separate reports. Each report has two parts:

Part 1: Summary Report

This comprises quantitative measures of Faculty of Medicine, Nursing, and Health Sciences students' perceptions in three areas: overall orientation experience, student views of the e-planner and orientation website, and student views on the environment. Also included in the report is biographical information concerning response patterns of Faculty of Medicine, Nursing, and Health Sciences students.

Part 2: Open-ended comment

Part 2 is produced as a separate document. It contains the full set of student open-ended comment concerning best aspects and aspects that could be improved in the three areas of the survey. Included in this report is also a brief overview of major issues identified by student open-ended comments in the three areas of this survey.

Part A: Student Detail

Campus Response

Of the 2682 Faculty of Medicine, Nursing, and Health Sciences students eligible to participate in this survey, 376 completed and submitted online responses, resulting in an overall response rate of 14%. Response rates for all campuses are reported in Table 1.

Table 1: Campus response rates

Campus	Number of Responses	Population Size	Response rate (%)
Berwick	2	0	
Caulfield	9	276	3.3
Clayton	185	1444	12.8
Gippsland	47	309	15.2
Parkville	0	0	
Peninsula	122	653	18.7
Faculty of Medicine, Nursing, and Health Sciences	376	2682	14

Mode of Study

A total of 85.9% reported that their main mode of study was on-campus with 4.3% indicating that their main mode of study was a mixture of on campus and off campus. 9.8% reported that their main mode of study was primarily off campus.

Study Load

A total of 91% reported that they were pursuing their studies on a full-time basis and 9% reported that they were part-time students.

Origin

Table 2 shows the origin of Faculty of Medicine, Nursing, and Health Sciences students.

Table 2: Origin of Students

Origin	Percentage
Australian/New Zealand/Australian Permanent residents	92.8
International	7.2

Age

The age groups of Faculty of Medicine, Nursing, and Health Sciences students completing the survey are shown in Table 3.

Table 3: Age

Age	Percentage
Under 17	1.6
17-19	61.4
20-22	13.6
23-29	10.4
30-39	8.2
40-49	4.5
50 and over	0.3

Gender

A total of 80.9% of Faculty of Medicine, Nursing, and Health Sciences students participating in the survey were female compared to 19.1% male.

Intake into Faculty of Medicine, Nursing, and Health Sciences

The student intake is shown in Table 4.

Table 4: Intake into Faculty of Medicine, Nursing, and Health Sciences

Route	Percentage
Straight from secondary school	52.4
Transferring from another university or TAFE college	10.4
As a non-school leaver	13
Following deferment of one year	12
Other	11.7

Attendance at Open Day

A total of 50% of Faculty of Medicine, Nursing, and Health Sciences students participating in the survey attended the Monash Open Day in 2007 with the remaining 50% reporting non-attendance.

Part B: Orientation Experience

Students reported three main ways that they found out about orientation activities. These were from the enrolment package, website and faculty enrolment (see Table 5). Students also reported other ways that they found about the Orientation information and activities (see Part 2).

Table 5: Student Access to Orientation Information and Activities

Access to information via ...	Percentage
Enrolment Package	48.1
Faculty Enrolment	43.6
Friends/Family	24.7
School/Teachers/CareersCoordinator	10.1
Showbag	31.6
Web Site	50.3
Other	4.5

Participation in Orientation Activities

The pattern of student participation over the 5 days that orientation activities were planned is shown in Figure 1.

Orientation Experience (Questions 13-17)

For the purposes of this analysis, satisfaction trends were constructed as Likert scales measuring 1 (Strongly Disagree) to 5 (Strongly Agree) and the middle term (3) being undecided. Means of responses are reported and these can be interpreted in terms of above 3 being positive and below 3 being negative. The distribution on the Likert scales is also reported. The sum of categories 4 and 5 (Strongly Agree and Agree) is taken to indicate “Agreement” and thus “good satisfaction”. Details of the breakdown by Faculty can be found in Appendix A, while breakdown by Campus can be found in Appendix B.

Students generally were in agreement regarding the helpful and informative nature of the orientation activities. The general agreement, as shown in Table 6, is reflected in the means which ranged from 3.77-4.1 with percentage aggregate distribution of responses for rating in the Strongly Agree/Agree categories ranging from 70.4%-87.6%.

17	Overall I was satisfied with the Orientation program provided by Monash University	4.03	84	25.5	58.5	10.8	3.8	1.4

Part C: eOrientation planner and the Orientation website

eOrientation Planner

A total of 57.4% of Faculty of Medicine, Nursing, and Health Sciences students participating in the survey reported using the eOrientation planner with the remaining 42.6% not using the planner. A number of reasons were reported by Faculty of Medicine, Nursing, and Health Sciences students on why they did not use the planner, with the main reason being that Faculty of Medicine, Nursing, and Health Sciences students were unaware of the availability of the planner. Other reasons included that Faculty of Medicine, Nursing, and Health Sciences students found it confusing and hard to use.

Students were asked to give their opinion on the usefulness of the information provided via the eOrientation planner. Results are summarised in Table 7.

Table 7: Student's opinion on Usefulness of the information provided via the eOrientation Planner

Opinion	Used the e-Orientation Website			
	No	%	Yes	%
Extremely useful	5	10.2	84	39.6
Somewhat useful	9	18.4	94	44.3
Neutral	11	22.4	21	9.9
Not very useful	6	12.2	12	5.7
Did not read	18	36.7	1	0.5
Not applicable	111		4	

Use of Monash University Orientation website

A total of 74.2% Faculty of Medicine, Nursing, and Health Sciences students who participated in this survey reported that they had used the website. The remaining 25.8% reported not using the site with some indicating reasons on why they did not use the site (see Part 2).

Uni Basics & Campus Information

Summary data showing the means and percentage "Agreement" for each of the items in this part is shown in Table 8. The items are constructed as Likert scales measuring 1 (Not at all Useful) to 4 (Extremely Useful), the middle item (2) being neutral. Means of responses are reported and these can be interpreted in terms of above 2 being positive and below 2 being negative.

The sum of categories 3 and 4 (Somewhat Useful and Extremely Useful) is taken to indicate “Agreement” and thus “good satisfaction”.

All 17 areas measured in this dimension regarding the usefulness of the information provided on the Monash University website, scored a mean of 2.363 or greater. The percentage “Agreement” ranged from 24.4%-83.3%.

Welcome Centre

A total of 27.5% of Faculty of Medicine, Nursing, and Health Sciences students who participated in the survey reported that they had visited the Welcome Centre.

Part D: The Environment

New in 2008 were a number of questions related to the environment. For the purposes of this analysis, answers to these questions were constructed as Likert scales measuring 1 (Strongly Disagree) to 5 (Strongly Agree) and the middle term (3) being undecided. Means of responses are reported and these can be interpreted in terms of above 3 being positive and below 3 being negative. The distribution on the Likert scales is also reported. The sum of categories 4 and 5 (Strongly Agree and Agree) is taken to indicate “Agreement”. Results are summarised in Table 9. Of the Faculty of Medicine, Nursing, and Health Sciences students surveyed, 94.3% agreed or strongly agreed that the environment is important at Monash.

A total of 62.8% of Faculty of Medicine, Nursing, and Health Sciences students who participated in the survey agreed to be contacted in 12 months time to see if/how their environmental behaviour had changed.
