Why choose Monash?

1. **Global recognition.** Our degrees are globally recognised, giving our graduates an extra edge – helping them thrive in the international job market.

2. **Prestige.** You get a qualification from a Group of Eight university.

3. **Expertise.** Undertake your course under the leadership and supervision of world-class scholars.

4. **Choice.** Monash offers one of Australia's most comprehensive ranges of postgraduate courses.

5. **Connections.** Monash is connected through partnerships and alliances with universities in North America, Europe, the UK, Asia and Africa. We also have a global network of campuses and centres.

6. **Relevance.** As a research-intensive university, our courses are designed using the latest research and industry developments.

7. Monash is based in Melbourne, Australia – the world’s most liveable city.
There are all kinds of brilliant in the world. Some can fill trophy cabinets, while others can fill bank accounts. But the kind of brilliant we believe in is the one that makes a difference. From pioneering the creation of life through IVF, to helping shape the careers of future leaders, it can achieve anything. That’s why we nurture brilliant by giving our students the knowledge, confidence and resources to do things they never thought possible. That’s not only what brilliant needs, but what it deserves. And that’s why Monash University is where brilliant begins.
Global reach, global reputation

Monash is active on four continents

Monash has partnerships with 16 leading universities in North America, Europe, Africa and Asia.

Monash is in the top 1% of world universities

Times Higher Education World University Rankings 2011-2012

The world’s top CEOs are more likely to hire Monash graduates

The New York Times, October 2011

The Suncorp Bank Power Index has named Monash a power institution, commending our credentials as a launching pad for Australian CEO’s.

Suncorp Bank Power Index 2012

Brilliant business leaders begin here.

60,000+

Monash students worldwide
Monash is a five-star plus institution. This means we are not just world-class, but an elite destination to which the very best students and faculty worldwide will aspire.

Monash University is a member of Australia’s Group of Eight. The group’s members produce more than 70% of all basic research conducted at all of Australia’s public universities.
Melbourne has a long-held reputation for welcoming international students and providing them with memorable study experiences.

It offers a high standard of living, and first-class education, health care, public transport, employment rates, safety and security.

Melbourne
www.visitmelbourne.com
Melbourne is consistently voted one of the best places to live in the world. The city is a rich, multicultural landscape of ideas, skills and personalities. The people are cosmopolitan, fun-loving and friendly.

The city has something for all tastes. From calm parks and gardens to the edgy arts and music scene.

Melbourne is also Australia’s restaurant capital, with more than 3000 restaurants and cafes, offering cuisines from around the world.

And, if you like sport, there are local competitions in all sports—and regular international events, including:

– Formula One Grand Prix
– The Australian Tennis Open
– Australian Rules Football
– Melbourne Cup and Caulfield Cup
– Rip Curl Surfing Titles
– Australian International Air Show
– International Test Cricket

*In a ranking of 140 cities all around the world, Melbourne ranked as the world’s “most liveable” city (Economist Intelligence Unit 2012). This ranking is based on standards of education, infrastructure, culture and environment, healthcare and stability.
During the academic year, a free Monash Shuttle bus service runs in both directions from:
- Clayton to Berwick
- Clayton to Caulfield
- Clayton to Peninsula
- Frankston Station to Peninsula

All Australian campuses are accessible by public transport. Public transport timetables and maps can be found at www.metlinkmelbourne.com.au.

Car
Parking is available at or near all Australian campuses.

Car pooling
Monash Rideshare is a carpooling scheme for students and staff traveling to Berwick, Caulfield, Clayton and Peninsula. Car poolers are eligible for free parking.

Bicycle
For details of local bicycle paths and bicycle lanes, refer to the Bicycle Victoria website at www.bv.com.au. Designated bicycle parking is provided at all campuses.

Accommodation
Monash Residential Services (MRS) can help guide you in your search whether you decide to live on or off-campus. For more information on accommodation, visit www.mrs.monash.edu or telephone +61 3 9905 6200.

On-campus
Living on-campus offers certainty and security for students living away from home. It is also a great way to concentrate on your studies and you’re part of a community of people also committed to their courses. The closing date for lodging applications for the following year is 30 November. www.mrs.monash.edu/oncampus

Off-campus accommodation
Off-campus accommodation options include student hostels, full board/homestay, part board, private apartments and private houses. For a list of suburbs near campuses, visit monash.edu/study/international/preparing/accommodation.html.

The Housing Advisory Service, part of Monash Residential Services, assists students with information and advice about off-campus accommodation. www.mrs.monash.edu/offcampus
Monash University has six Australian campuses, campuses in Malaysia and South Africa, a Joint Graduate School in China, centres in Prato, Italy and Mumbai, India and a network of partners across the globe.

Berwick
Berwick is a small, friendly campus with about 2000 students about 40 minutes south east of Melbourne. It is a five-minute walk from the heart of Berwick’s specialty shops, cafes and business services.
www.berwick.monash.edu

Caulfield
Caulfield is the second largest Monash campus, with about 13,000 students. It is the main centre for the faculties of Business and Economics, Art Design & Architecture, and Information Technology. Caulfield is nine kilometres from the Melbourne city centre and adjacent to Caulfield train station. The campus has a gym, library and cafes, and is close to several shopping precincts.
www.monash.edu/campuses/caulfield

Clayton
Clayton is the largest of the University’s campuses. It combines a vibrant research, technology and manufacturing precinct with first-rate sporting facilities, shops, a student centre, libraries, a post office, banks, medical services and religious centres. The campus can be reached by public transport utilising an extensive bus network combined with train stations in surrounding suburbs.
www.monash.edu/campuses/clayton
Monash
Gippsland
Monash Gippsland is the University’s only regional campus – situated about a two-hour drive from Melbourne. Eight of the 10 Monash faculties are represented on campus, providing a broad array of undergraduate and postgraduate academic programs and research activities. Home to 2000 on-campus students, 5000 off-campus students and nearly 400 staff, the campus is valued as a place to study and live away from the pressures of city life. It is easily accessible by a bus connection from Morwell train station or by car.
www.gippsland.monash.edu

Peninsula
The Peninsula campus is about an hour’s drive south of Melbourne, between the bay and the beach. It is a centre for nursing and paramedic training and early childhood and primary education, and is also being developed as a centre for health science research. There is a bus connection to Frankston train station, and a free shuttle bus runs between Peninsula and Clayton campuses.
www.monash.edu/campuses/peninsula

Suzhou, China
Following recent endorsement by China’s Ministry of Education, the Southeast University-Monash University Joint Graduate School (Suzhou) will officially welcome its first students this year. Located in Suzhou, near Shanghai, the Graduate School will feature postgraduate courses in a range of disciplines including nanotechnology, biomedicine, environmental science, transportation, industrial design, economics, and software, thermal and mechanical engineering. Monash University is the first Australian university to be granted a licence to operate in China.
www.monash.edu.au/study/campuses/china.html

Sunway, Malaysia
Monash University Sunway campus was the first international campus of Monash University.
The campus offers state-of-the-art teaching and learning infrastructure to almost 4000 students. There are specialised laboratories for various fields of study. The University provides financial assistance for intercampus student exchange between Malaysia and Australia.
www.monash.edu.my

South Africa
The South Africa campus is dedicated to educating the future leaders of Africa. The campus is located on a 100-hectare site in Ruimsig, a growing suburb 23 km from the Johannesburg city centre. Students at the campus benefit from small classes, advanced facilities and state-of-the-art technology. There is a strong volunteering ethic on the campus. Many students give up their free time to help disadvantaged children with their school work.
www.monash.ac.za

IITB-Monash Research Academy, India
The IITB-Monash Research Academy, based in Mumbai, India is an exciting partnership between the Indian Institute of Technology Bombay (IITB) and Monash University – two of the world’s leading educational and research institutions. Together IITB and Monash are taking a collaborative approach to multidisciplinary research that can deliver high impact, integrated solutions to complex research problems for industry, government and the broader research community. The Academy will be located in a purpose-built, modern facility located at the Powai campus of IITB.
www.iitbmonash.org

Off-campus
If work or family commitments prevent you from attending one of our campuses, consider studying off-campus. Please note, the Australian Government does not grant international student visas for students studying off-campus programs.
www.monash.edu.au/offcampus
Postgraduate coursework degrees at Monash are offered in all disciplines. Many master’s degrees are designed so you can exit early with a Graduate Diploma or Graduate Certificate. In this way, if you need to withdraw from study for some reason, the work you have already done will be recognised, and awarded a qualification.

Research options
Monash offers research-based postgraduate degrees in all disciplines. While the challenge takes commitment, drive, motivation and talent, the benefits are enormous. It will enable you to pursue a passion, working in a supportive environment with like-minded people, and open incredible career opportunities.

Coursework and research
Combined degrees offer you the flexibility to complete part of your course by following a unit-based program, and part of it by completing a research thesis. It will allow you to grow through experiencing two very different methods of higher education.

English Language programs
The English Language requirements for postgraduate study are generally higher. English programs to suit a wide range of abilities are available through Monash College and can be packaged into your offer. Monash English Bridging can help you achieve the level of English you need to enter your course and the Introductory Academic Program can prepare you for living in Australia and studying at Monash University.

Test your English!
Find out your level of English with our free online test*. The test helps you to estimate how many weeks English you might need to reach the entry requirement.

Streamlined Visa Processing (SVP)
Monash University has partnered with the Department of Immigration and Citizenship (DIAC) in the Streamlined Visa Processing (SVP) arrangements introduced in March 2012. The SVP will greatly benefit international students by streamlining the documentation required for a student visa application and accelerate the application process for the vast majority of all inbound international students to Monash.

Visas for family members
If you want to bring your family to Australia for the duration of your study, you must include them in your application for a student visa. They will be assessed for visa entry at the same time. You will need to provide evidence that you have enough money to support your dependants in Australia and they may have to complete medical and other tests. For further information on family visas see www.immi.gov.au/students/students/bringing_family

*This test is to be used as a guide only and is not a replacement for the IELTS test.
Research scholarships

There are various scholarships for international students wishing to undertake a master’s degree by research or doctoral program at Monash University. Applicants should hold, or expect to hold, a bachelor’s degree with first class honours or qualifications and/or research experience deemed equivalent by the University.

There are no age restrictions. Some scholarships cover living expenses and may be combined with a second scholarship covering tuition fees.

Living allowance scholarships include:
- Monash Graduate Scholarships
- Silver Jubilee Postgraduate Scholarship
- Sir James McNeill Foundation Scholarship

Tuition fee scholarships include:
- the Endeavour International Postgraduate Research Scholarship
- the Monash International Postgraduate Research Scholarships
- the Vera Moore International Postgraduate Research Scholarship.

The Monash Institute of Graduate Research offers generous travel grants for conference attendance and other activities related to the candidate’s research project.

Doctoral and master’s by research students who are under examination may also apply for publications grants. A statistical support service is also available.

Further information can be obtained from the Monash Institute of Graduate Research (MIGR):
www.monash.edu/migr/support/scholarships/

Coursework scholarships

Scholarships and bursaries are available for prospective and continuing postgraduate students. Coursework postgraduate students, visit www.monash.edu/scholarships.

Industry experience

Add industry experience to your CV by completing an Internship or Professional Year program with Professional Pathways Australia (PPA). Last year 70% of PPA graduates found employment within three months of graduation.

Give your career a head start: www.professionalpathwaysaustralia.com.au

Monash University commits more than $90 million a year to student scholarships, prizes and awards.
Making a difference

Monash is a university that seeks to make a difference. We judge our research not only by its academic excellence, but by the impact it has on the communities we engage with and serve.

We have always recognised that our work does not end at the “Eureka!” moment. It continues until we have found a way to turn our breakthrough into a change for the better.

Our research specialisations:
- health and wellbeing
- future technologies
- sustainable environments
- resilient cultures and communities

Our research tradition

Even before we became the global university we are today, our researchers looked beyond traditional boundaries, creating new frontiers and discovering new ways of approaching the fields in which they worked. It’s why a Monash education is respected around the world. Things that we now take for granted would not exist without the initial work of Monash researchers:

First In-vitro Fertilisation Pregnancy
Professors Alan Trounson and Carl Wood achieved the world’s first IVF pregnancy in 1973. The Trounson and Wood team went on to achieve Australia’s first (and the world’s fourth) successful IVF birth in 1980.

Influenza treatment
In 1986, a team from our Faculty of Pharmacy and Pharmaceutical Sciences (formerly the Victorian College of Pharmacy) designed and synthesised the anti-flu drug, Relenza. Relenza first became available in Australia in 1999 and is now used globally.

Road safety (seatbelts)
In 1964, work by Monash researchers led to the world’s first laws requiring that seatbelts be installed in all new cars. Dramatic decreases in road deaths and injuries followed immediately.

Nobel Peace Prize
In 2007, eight scientists from Monash University shared in the prestige of the 2007 Nobel Peace Prize, awarded jointly to the Intergovernmental Panel on Climate Change and former US Vice-President Al Gore.
Our orientation service incorporates a series of programs to help students adjust to a new country, and find their way around campus, not to mention the surrounding community. Activities include visiting the local supermarket, using public transport, social events and friendship programs.

Student support
Monash has services in place to help you adapt to and enjoy your university life as well as fulfill your academic potential. Student Service Centres are located on each of the Australian campuses. Staff can deal with your questions on admissions, enrolment, fees, examinations, graduations and scholarships.

www.adm.monash.edu/servicecentre

Monash Postgraduate Association (MPA)
All Monash postgraduate students automatically become members of the Monash Postgraduate Association. In addition to its seminar program, the association provides services for postgraduate students, including:

- social functions such as lunches, coffee clubs and question-and-answer sessions
- newsletters and publications including Compass, MPA guide to postgraduate programs and a weekly MPA email news bulletin
- advice, advocacy and mediation on issues that postgraduate students may encounter during their study
- representation on Monash University and faculty committees
- seminars to help you make the transition from successful study to a successful career, these seminars address helpful topics like publishing, time management, career management and writing skills.

For details, visit www.mpa.monash.edu

Academic support
During their studies, students have access to academic support programs to improve written and oral expression, reading, listening and note-taking skills. Tutors are available to guide advanced students through research methodology, conference presentation and the best way of submitting academic papers.

e-Research Services
The Monash e-Research Centre provides all Monash researchers with access to outstanding advice and assistance – to help you manage your research projects and data effectively and efficiently. The centre can give you the advice, information and assistance you need to help you identity, specify, develop and configure IT tools, data management systems and practices, to meet your specific needs.

www.monash.edu/eresearch/ internal.html

Family support
Monash Family and Child care supports international students with children, or families who are studying at Monash. Advice is available regarding childcare, primary school, playgroups, school holiday care and other child and family support issues. Social events for international students with families are held throughout the year.

www.adm.monash.edu.au/community-services/family

Wellbeing
Each Monash campus features a Health, Wellbeing and Development Hub that offers support, information and advice to international students on a wide range of issues including settling into life in Australia:

- settling into life in Australia,
- cultural adjustment
- student visa
- healthcare
- finding your way around campus
- study and life balance issues

www.monash.edu/health-wellbeing

A postgraduate degree takes commitment and drive. To help you maintain the momentum you build, we help put you in touch with like-minded people. To share information. To build networks. To get the support to keep you going.

Monash helps students settle into university life by providing an extensive range of support programs and services.
At a glance

- **Research intensive**: One of the largest studio-based research degree programs in Australia.
- **Experience**: Our staff are leading practitioners, creative professionals and renowned researchers.
- **Influential graduates**: Our graduates are shaping the future of art and design around the world. As award-winning practitioners, they push artistic and social boundaries and challenge established ideas.
- **World-class facilities**: Purpose-built art, design and architecture studios, laser-cutting lab, 3D printing and automotive transport clay modelling studio.

Study in Prato, Italy
The faculty offers a biannual research study at the Monash Centre in Prato, near Florence with a visit to Venice for the Biennale. The study is based around individual research with an extensive cultural support program, exploring the visual resources of Tuscany. It includes visits to museums, galleries and buildings in the surrounding region as well as Prato. The program visits Ravenna for its spectacular mosaics on the way to Venice and Padua to view the magnificent Giotto in the Scrovegni Chapel. In Venice the program looks at the main Biennale sites as well as the historic visual culture of the city. Integral to all faculty studies is the cultural experience of being part of a medieval city, complete with walls, churches, palaces and winding cobbled streets; a living museum which brings history alive and makes it a part of daily life.

Completing your research in Prato gives you access to some of the world’s greatest collections of art and design as it is close to Tuscany’s renowned art collections such as the Uffizi and the Accademia. Prato also houses the Pecci Foundation, the most important contemporary art museum in central Italy.

Research excellence
The faculty is recognised and respected for providing excellence in education, practice and research that is characterised by a spirit of enquiry and collaboration. Our energy is driven by a community of staff who are active art and design practitioners, and architects and theorists that focus on critically informed creative activity at the highest level.

Together staff and students form a community of practitioners and scholars immersed in creative production and collaborating on extending the boundaries of visual culture.

Cameron Tullberg
Master of Multimedia
After graduating from Monash with a Master of Multimedia, Cameron combined his interests of policing and graphic design to head Victoria's Criminal Identification Squad.

The CIS squad has worked with the Bushfires Royal Commission in recreating people’s movements during the fires and assisted the Australian Federal Police to help with imagery of the 2002 Bali bombing suspects.
Coursework degrees

Master of Architecture
This studio-based program will engage students with social, historical and theoretical contexts of architecture, as well as providing knowledge of professional practice of architecture. The Master of Architecture meets the academic requirements for professional registration.

3120 2 years FT Caulfield Applicants should hold an Australian bachelor’s degree in architecture from a recognised tertiary institution. This qualifying undergraduate program must have been completed within five years of the proposed commencement of the Master’s program. Students who have successfully completed the Bachelor of Architectural Design at Monash University will automatically progress to the Master of Architecture. Applicants will send a folio and curriculum vitae along with their application; shortlisted international students will be interviewed by telephone or by video conference.

First Semester (February) 26,810 A

Master of Design
The Master of Design by coursework combines design practice with the necessary skills in marketing and business to sharpen your professional practice and analytical skills to an advanced level. Graduates from this program will demonstrate highly developed capabilities that will place them at the forefront of contemporary design practice.

3113 1.5 years FT Caulfield Applicants should hold an Australian bachelor’s degree or equivalent from a recognised tertiary institution in an art or design field. Applications should be accompanied by 10-15 images of recent, original work, clearly numbered with a corresponding list of details attached and a current academic and professional curriculum vitae.

First Semester (February) Second Semester (July) 26,620 A

Master of Multimedia
This three-semester program is designed for people with no art or design background, but who recognise the value of adding multimedia capabilities to their professional work. Students will learn all aspects of design, media and technology, supported by theory units relevant to the multimedia industry.

3102 1.5 years FT Caulfield Applicants should hold an Australian bachelor’s degree or equivalent from a recognised tertiary institution.

First Semester (February) Second Semester (July) 26,620 A

Master of Visual Arts
The Master of Visual Arts is a flexible degree which attracts artists wishing to extend their practice within the context of contemporary visual arts discourse. This course is designed for students with an undergraduate degree in art or design, and technology, supported by theory units relevant to the multimedia industry.

3108 1.5 years FT Gippsland Applicants should hold an Australian bachelor’s degree or equivalent from a recognised tertiary institution in an art or design field. Applications should be accompanied by 10-15 images of recent original work, clearly numbered with a corresponding list of details attached. Students must be able to demonstrate a high level of capability in their chosen studio discipline. They should provide personal statement of no more than 200 words summarising the direction of their current practice, including materials, techniques and content.

First Semester (February) 26,820 A

Research degrees

Doctor of Philosophy
The PhD program at Monash rigorously trains candidates in research through academic supervision, plus a suite of seminars, discussion groups and coursework units. Monash has grown into a large and multi-faceted institution supporting a wide range of research activities across the spectrum of visual culture. The PhD program may be taken in studio-project or dissertation mode.

1322 4 years FT Caulfield, Gippsland The PhD is a university award administered by the Monash Graduate Research Committee. For either mode, the minimum qualifications for admission to PhD candidature are: a bachelor’s degree (at least four years of full-time study), which normally includes a research component in the fourth year, leading to an honours degree class I or IIA level in an area appropriate to their research discipline; or a course leading to a master’s preliminary qualification at a level rated by the faculty as equivalent to an honours class I or IIA; or a master’s degree that entailed work, normally including a significant research component, at least equivalent to an honours degree. All applications for studio-project mode must be accompanied by a folio of 10-15 images of recent original work, clearly numbered with a corresponding list of details and a research proposal of 200-300 words.

Throughout the year 26,620 J

Master of Arts
This course is offered in the principal research area of the history/theory of visual culture. The program requires students to develop a comprehensive written proposal that outlines their proposed project, places the research within the context of the scholarly literature and outlines the proposed methodology. Students will be examined entirely on the basis of the written paper, unlike the Master of Fine Arts or Master of Design, which focus on visual work. The thesis should be between 30,000 and 40,000 words.

0498 2 years FT Caulfield, Gippsland Students should hold an Australian bachelor’s degree with honours (I or IIA) or equivalent from a recognised tertiary institution in an area appropriate to their research discipline. The Faculty may consider alternate qualifications in certain circumstances. Such applications will be considered on a case-by-case basis. All applications must be accompanied by a research proposal of 200-300 words.

First Semester (February) 26,820 J

Master of Design (by Research)
Monash University’s research program in design encourages candidates to explore ideas and concepts within a studio environment. The core aim of the program is the development of a new body of work, informed by the social need and imaginative potential of design within the selected field of inquiry.

3111 2 years FT Caulfield Applicants should hold an Australian bachelor’s degree with honours (I or IIA) or equivalent from a recognised tertiary institution in an area appropriate to their research discipline. In special circumstances, the Faculty may admit an applicant who lacks any of the qualifications listed above, but whose publications, professional practice (five years minimum), creativity, design registrations (or patents in other countries), major commissions and other experience is considered by the Faculty to be equivalent research training in the proposed field of study. Such applications will be considered on a case-by-case basis.

First Semester (February) 26,820 J

Master of Fine Art
This popular research program attracts visual artists who are passionate and committed to their practice, capable of independent analytical thought, and who are informed about the context and role that the visual arts play in the formation of contemporary culture.

2953 2 years FT Caulfield, Gippsland Applicants should hold an Australian bachelor’s degree with honours (I or IIA) or equivalent from a recognised tertiary institution in an area appropriate to their research discipline. The Faculty may consider alternate qualifications in certain circumstances. Such applications will be considered on a case-by-case basis. All applications must be accompanied by 10-15 images of recent original work, clearly numbered with a corresponding list of details attached and a research proposal of 200-300 words.

First Semester (February) 26,820 J

English language level: Please see page 58–59 for detailed requirements.
At a glance

- **International focus:** Study options on four Australian campuses and four international locations: China, Malaysia, South Africa and Prato, Italy. The faculty has exchange agreements with 120 universities throughout the world.

- **Excellent resources:** One of the world’s largest collections of online databases with 243,838 e-books, 33,991 e-serials and 798 electronic databases.

- **Flexibility:** Off-campus study available, both part-time and full-time. Study across disciplines with another faculty or make it a double degree.

**Double Master in Translation Studies**

The Double Master in Translation Studies is a collaboration between the Monash Translation Studies program and the English Studies department at Jean Moulin University (Lyon, France). This two-year degree is aimed at French and Australian students who wish to become translators. Courses are based on theory and practice and are taught collaboratively by academics and professional translators.

For two years, students are completely immersed in the two languages and cultures, taking one full year of courses in Australia and another in France. A special feature of the degree is the opportunity to work in industry for several months with professional translators providing key contacts and excellent career opportunities. Graduates qualify with two master’s degrees.

The Monash Translation Studies program is approved by NAATI (National Accreditation Authority for Translators and Interpreters).

**Research excellence**

- **Broad supervision:** As one of the largest arts faculties in Australia, we have the capacity to supervise almost any topic. We can also offer supervisory teams across disciplines and in collaboration with universities throughout the world.

- **Research support programs unique to Arts:** We provide a range of highly successful programs to help our research students achieve standards of excellence. This includes initiatives such as the Tricks of the Trade seminar series and Graduate Researchers in Print program.

**Sunshine Kamaloni**

PhD

Sunshine is the current President of the Monash Postgraduate Association. Originally from Zambia, she commenced her undergraduate studies at Monash South Africa before transferring to the Monash Caulfield campus in Melbourne.

Drawing on her own experience as a Black African woman living in Australia, Sunshine’s research is focused on highlighting the complex ways in which race and racism continue to be sustained in mundane interactions and how people individually and collectively experience these things.

#### Graduate Diploma in Applied Linguistics
Professionals who know how language works and how it can be used in a multitude of situations are highly valued in the workplace. This course offers students an introduction to fundamental areas of applied linguistics, research training and opportunities to specialise in such areas as second/foreign language acquisition, language teaching, language contact and intercultural communication. It provides excellent preparation for further studies in the application of linguistics to professional and social contexts offered in the master’s program.

The Graduate Diploma in Applied Linguistics is available in the following streams: General Applied Linguistics (available both on and off-campus); Japanese Applied Linguistics, (on-campus students only); English as an International Language (on-campus students only).

#### Master of Applied History
This course is intended for students who wish to pursue careers in such fields as commissioned research and writing, heritage conservation and management, oral history, community, local and institutional history, museums and related areas. The course has excellent links with the heritage industry, other leading Australian universities and professional historians working in these fields. Students can choose from a wide range of electives including Australian history, environmental history, biography and life writing, gender and history, and archaeology. The course includes a placement focused on work experience and the building of professional networks or a commissioned research project.

#### Master of Applied Linguistics
Postgraduate linguistics focuses on sociolinguistics (language in society), discourse studies and the applications of linguistics to language issues including the teaching and learning of languages, literacy, bilinguality, language policies, language planning and language endangerment. The Master of Applied Linguistics is available in the following streams: General Applied Linguistics; Japanese Applied Linguistics; English as an International Language.

#### Master of Asian Studies
Students gain knowledge about the cultures and societies of one or more of the many nations that form the Asian region. With a broad range of electives to choose from, students can design the course most relevant to their professional and educational aspirations, be it in areas such as business and law or the humanities. Throughout the course students are encouraged to engage critically with the notions of ‘Asia’ and ‘Asian values’ and to make an informed assessment of past and current issues in the Asian region or in international relations within or with the region.

#### Master of Bioethics
This course provides an interdisciplinary education that is concerned with the ethical issues raised by medicine and the biomedical sciences. It is suited to health care professionals, scientists who face complex ethical issues in their working lives, those involved in developing public policy and law and those who are interested in exploring issues of public concern in greater depth. Studies cover questions of life and death, ethical issues in patient care, legal issues in bioethics and ethical issues in professional life. Students who have completed at least one semester of the course are eligible to apply for an annual fellowship to work during the Australian summer as an intern in the human genetics program at the World Health Organisation in Geneva.

#### Master of Communications and Media Studies
This program is designed to address the needs of those working, or aspiring to work, in the communications industry. It looks at the history, development and reception of traditional and new media both globally and with reference to Australia, Malaysia and Singapore. Contemporary policy debates in these and other nations are studied as responses to changing processes of mediation and consumption. More widely, the degree aims to develop skills in communications and media research.

#### Master of Asian Studies
Students gain knowledge about the cultures and societies of past and current issues in the Asian region or in international relations within or with the region.

#### English as an International Language
A bachelor’s degree with a credit average or a related graduate certificate with a credit average. | First Semester (February); Second Semester (July) | 26,500 $ | A                    |
#### Japanese Applied Linguistics
A bachelor’s degree with a credit average or a graduate diploma with a credit average. | First Semester (February); Second Semester (July) | 26,500 $ | A                    |
#### English as an International Language
A bachelor’s degree with a credit average or a graduate diploma with a credit average. | First Semester (February); Second Semester (July) | 26,500 $ | A                    |
Master of Counter-Terrorism Studies
This course offers a rigorous course of study that examines terrorism and political violence in international politics. It provides a critical understanding of what terrorism is and how it is constructed and reproduced. It also addresses the diverse and multifaceted factors involved in enacting and preventing terrorism and other security concerns. The course is suited to professionals working in law enforcement, public service, defence and diplomacy as well as those who are interested in pursuing postgraduate study. Studies cover terrorism (state, religious, revolutionary and right wing); the political, theological and intellectual bases of terrorism; political violence and political movements; and country and regional studies. Theoretical and empirical units that examine the international processes and events that fuel and discourage terrorism provide further context.

Master of Cultural Arts
The Master of Cultural Arts is an interdisciplinary degree designed to equip students with advanced knowledge and skills necessary for participating in and managing creative arts sectors and industries.

Master of European and International Studies
This interdisciplinary course explores the significance of the European Union in the world. It investigates its political, legal, economic, social, humanitarian, environmental and security implications for the international system. Its goal is to provide professionals or future professionals with a particular interest in the European region with a broad and deep understanding of the institutional framework and policy-making processes of the European Union and its relations with non-EU countries. The course draws on a wide range of disciplines, offers a broad choice of core units and an extensive range of electives.

Master of International Crisis Management
This course aims to develop the required knowledge, skills and competencies for professionals responding to complex emergencies and post-crisis management. It has been designed to meet the needs of professionals for academic training in the currently neglected field of complex crisis management, including the core issues of human security, conflict and natural disasters.

The course introduces students to the principles of multi-disciplinary crisis management through evidence-based case studies, and stresses the importance of a people-centred approach and a sound understanding of relevant issues such as human rights, vulnerable groups and sustainability.

A special feature of this course is its inter-disciplinary approach allowing students to select a course most relevant to their professional and educational aspirations, be they in areas such as medicine, business, engineering, law or the humanities.

Master of International Relations
This course allows graduates in politics or cognate disciplines to explore the many issues raised by the rapidly changing nature of the contemporary international system. It is particularly suitable for those interested in pursuing careers in areas such as government, diplomacy, business, teaching and journalism. It pays particular attention to relationships among major powers and to developments in Australia's region. Units covering areas including international security and regional politics provide a thorough grounding in the principal theoretical approaches in international relations and the ways in which these approaches may be used to analyse issues.

Master of Interpreting and Translation Studies
The Master of Interpreting and Translation Studies is suited to students with advanced bilingual proficiency and aims to develop their interpreting and translation skills while raising awareness of practical and theoretical approaches to translation/interpreting practice and studies. Students gain a foundation in theories of translation and interpreting and receive training in research on these areas. The core units provide intensive language-specific practice in written and oral transfer skills to the NAATI professional level.

Master of Islamic Studies
This course offers a broad and comparative introduction to the social, historical and political aspects of Islam. It covers a range of areas and disciplines such as international relations theories and practice, human rights, international business and concepts of nationalism and post-colonialism. The history of Islam and its civilisation, diversity of thoughts and interpretations, geographical spread, challenges of modernity and globalisation and the practice of Islam in the west is explored.
Master of Journalism

Students develop advanced literacy skills (written, oral, computing, visual, televised, digital), professional skills in the craft of media writing and production, advanced professional knowledge of legal issues and ethics relating to journalism and publishing for the mass market, and high levels of communication and negotiation skills. An extensive critical understanding of the theory of the role of the Fourth Estate in comparative media systems, investigative skills applicable to a media workplace, familiarity with changing technologies including convergence and multimedia in the journalism workplace, and advanced information management skills are developed. In addition, students develop a demonstrated ability to apply skills of judgment, interpretation, analysis, and critical thought.

Master of Journalism and Master of Business

The Master of Journalism and Master of Business provides a comprehensive introduction to Australian and international business and an entry-level qualification for a professional journalism career, and a mid-career course for working journalists/business people seeking to extend their expertise and refresh the intellectual basis of their practice. It has a national and international orientation designed to optimise the contribution graduates will make to their professions using a full range of media technologies.

Master of Journalism and Master of European and International Studies

The Master of Journalism and Master of European and International Studies provides a comprehensive introduction to European society and culture, the European Union and its relations with non-EU countries, regions and international organisations. It also provides an entry-level qualification for a professional journalism career, or a mid-career course for working journalists seeking to extend their expertise and refresh the international basis of their practice. It has a national and international orientation designed to optimise the contribution graduates will make to their profession using a full range of media technologies.

Master of Journalism and Master of International Relations

The Master of Journalism and Master of International Relations provides a comprehensive introduction to the nature of the international political system and some of the key issues in contemporary international relations, an entry-level qualification for a professional journalism career, and a mid-career course for working journalists seeking to extend their expertise and refresh the international basis of their practice. It has a national and international orientation designed to optimise the contribution graduates will make to their profession using a full range of media technologies and insights into approaches to international relations.

Master of Journalism and Master of Sustainability

The Master of Journalism and Master of Sustainability provides a comprehensive introduction to environmental sustainability and sustainable development, and an entry-level qualification for a professional journalism career, and a mid-career course for working journalists seeking to extend their expertise and refresh the intellectual basis of their practice. It has an international orientation designed to optimize the contribution graduates will make to their profession using a full range of media technologies. The Master of Sustainability portion of the course offers a choice of three distinct streams: Environment and Sustainability, Corporate Environmental and Sustainability Management, and International Development and Environmental Analysis.

Master of Publishing and Editing

The publishing industry is a significant employer of tertiary-educated and otherwise highly skilled staff in the long-established book and magazine sectors, and now also in the electronic publishing sector. This program provides editorial and management skills for those wishing to become involved in scholarly, commercial, educational, academic and corporate publishing, and/or to further their careers and aspirations in publishing, or to establish their own small business. The course provides an overview of Australian publishing and its international connections and a variety of vocationally oriented special knowledge and skill-based units. Please note that all classes for this course are held in the city.
### Master of Sustainability
This interdisciplinary course is designed to meet the needs of graduates from a wide range of backgrounds who wish to enhance their qualifications for careers in environmental sustainability, corporate sustainability management, or sustainable development, encompassing policy and analysis, planning, consulting, education, advocacy and management. It is also designed for those who wish to broaden and deepen their understanding and experience to enable societal, organisational and individual change and responsible action to support sustainability both domestically and internationally. The Master of Sustainability comprises three distinct streams: Environment and Sustainability; Corporate and Environmental Sustainability Management; International Development and Environmental Analysis. All three streams offer a research or internship project component, which provides students the opportunity to work in interdisciplinary real-world contexts to combine theory and practice in responding to local and global issues at individual, community, corporate and government levels.

### Master of Tourism
The course has been designed to equip students with the skills required to develop or extend a career in the tourism (or associated) industry. A strong industry focus allows students to critically evaluate tourism from diverse perspectives and immediately apply theoretical knowledge to practical situations. Students complete four core units and two electives. Units covered may include marketing and international marketing, cultural tourism, development and planning, e-commerce, information technology, environmental studies, cross-cultural and regional studies and communications.

### Degrees by research and coursework

#### Master of Arts by Research and Coursework
This combined degree allows students the flexibility to complete part of the course by following a unit-based program and part of the course by completing a research thesis. Students complete coursework in their first semester, then have one year to write a thesis of 20,000 to 25,000 words on a chosen topic.

#### Master of Arts (Music Performance)
This course offers students the opportunity to undertake a project on an approved topic in music-performance research by preparing a well-researched, high-quality recital performance of challenging works that are recorded and submitted as part of a portfolio along with a program booklet and explanatory research essay. On completion, students should have developed instrumental or vocal performance skills to the level required for professional performance, as well as appropriate skills in research and writing.

Master of Environmental Science by Research and Coursework
Research emphasises the processes behind human-environment interactions, the development of policy, and the implementation of management strategies favourable to the environment. The program offers a primary insight into the nature of the environmental issues through core coursework units involving interdisciplinary research and an understanding of the social construction of the issues.

Doctor of Philosophy (Creative Writing)
This course is designed to enable candidates to engage intellectually with their creative process and to acquire a professional qualification in the area of creative writing. Candidates are required to submit a piece of their own creative writing which may be in the form of a novel, a group of short stories, a play or group of plays, a sequence of poems, or a portfolio of works of various genres. Candidates are also required to submit a critical commentary focused on their piece of creative writing.

they would like to continue on to a PhD. The Master of Arts degree by 100% research enables candidates to develop a chosen topic while under the supervision of an academic. The following languages are subject to staff availability: French, German, Indonesian, Italian, Japanese, Korean, Spanish, and Turkish. The course aims to equip students with a sophisticated understanding of the real world application of their research. It appeals to a broad range of candidates including theatre professionals, practitioners, educators, honours students and those who want to advance their knowledge and skills in areas such as: creating performance work for professional production; understanding the mechanics of performance making and theatrical production and; exploring methodologies of practice as research in performance. This course requires candidates to develop and present a live performance in a public venue, and submit a written commentary which the candidate proposes to both an applicant's academic training as well as performance abilities. Applicants must also submit evidence of practical work in the form of two or three pages addressing the following headings:

1. A representative selection of the candidate's performance work, in the practice genre in which the candidate proposes to work (i.e. audio and/or visual recordings).
2. Examples of comparative practice as research and associated literature.
3. A covering letter explaining the candidate's interest in the degree and a CV outlining the candidate's professional interests, previous performance projects, and publications if any.

The course aims to equip students with a sophisticated understanding of the real world application of their research. It appeals to a broad range of candidates including theatre professionals, practitioners, educators, honours students and those who want to advance their knowledge and skills in areas such as: creating performance work for professional production; understanding the mechanics of performance making and theatrical production and; exploring methodologies of practice as research in performance (an area recognised as cutting edge in international theatre and performance studies).

The course aims to equip students with a sophisticated understanding of the real world application of their research. It appeals to a broad range of candidates including theatre professionals, practitioners, educators, honours students and those who want to advance their knowledge and skills in areas such as: creating performance work for professional production; understanding the mechanics of performance making and theatrical production and; exploring methodologies of practice as research in performance (an area recognised as cutting edge in international theatre and performance studies).

The PhD in Translation Studies offered at Monash University adopts an interdisciplinary approach and introduces candidates to the methodologies of practice as research. Candidates are required to submit a body of translated work together with a critical exposition. While its focus is on the theory and practice of translation, it draws upon a wide variety of fields including language, culture and literary studies, linguistics, semiotics, media and technology, science, finance and the law.

The PhD in Translation Studies offers two pathways: the Doctor of Philosophy (Translation Studies) and the Doctor of Philosophy (Music Performance). Each pathway has its own set of requirements and entrance criteria.

The Master of Arts degree by 100% research enables students to undertake substantial independent research on a chosen topic while under the supervision of an academic. Students often complete the master's by research because they would like to continue on to a PhD.

The minimum qualifications for admission to 100% research master's candidature are: a four-year Australian or New Zealand bachelor's degree with an overall result of H2A or above; an Australian or New Zealand coursework master's degree with a significant research component graded at Distinction or above, and an overall result of H2A or above; an Australian or New Zealand research master's degree with an overall result of H2A or above; or a qualification considered equivalent to one of the above (a minimum of a Bachelor's degree with substantial professional experience in the field).

The following languages are subject to staff availability: Arabic, Croatian, Russian, Serbian and Ukrainian.

At a glance

Teaching and research excellence: Monash University has established an enviable reputation for teaching and research excellence across business disciplines. This reputation is built on our innovative and progressive approach to course delivery, and the strong links we have forged with commerce and industry, both in Australia and overseas, making Monash business degrees truly international and enabling graduates to work around the world.

International accreditation:
The faculty was the first in Victoria and one of a small number of elite entities worldwide to receive accreditation by the prestigious European Quality Improvement System (EQUIS). EQUIS is the leading international system of quality assessment, improvement and accreditation of higher education institutions in management and business administration.

Global reputation: The Monash MBA is consistently ranked in the top MBA programs worldwide. Our MBA program is the third in Australia to be accredited by the Association of MBAs (AMBA), recognised internationally as the global standard for MBA programs across the globe.

Research Excellence: More than 350 students take the Master of Philosophy and Doctor of Philosophy by research. With research strengths across all major business disciplines, the faculty supports a wide range of research endeavours including The Centre of Policy Studies (CoPS) and The Centre for Health Economics.

Personal and professional development
The Faculty of Business and Economics provides a range of personal and professional development activities including regular workshops in networking, career readiness, academic development, leadership and mentoring for graduate students. These are designed to enhance and complement your study, add value to your academic life and transform your career path. Personal development units, designed to enhance your capacity to lead and manage in an international business environment, are available within our master’s programs.

Professional accreditation
Our programs satisfy the educational requirements for professional registration by relevant professional bodies including CPA Australia, Institute of Chartered Accountants in Australia (ICAA), Financial Services Institute of Australasia (FINSIA), National Institute of Accountants (NIA), Australian Institute of Management (AIM), Australian Human Resources Institute (AHRI), Australian Marketing Institute (AMI).

Helena Chen
Master of Business
A Monash Master of Business turned Helena Chen’s interest in corporate social responsibility into a passion. Today, thanks also to the Green Steps Program; she has the skills and knowledge to show companies the way towards a more sustainable future.

Master of Business
This flexible, industry-focused program is specifically designed for early career professionals seeking to refine their business skills and advance to the next stage in their career. With specialisations including marketing, information technology, and law and responsible business as well as risk and supply chain management, it enables students to build a degree encompassing the skills they choose, need and want. The program covers broad business skills such as advanced written and oral communication, global outlook, and moral and social responsibility, while also allowing students to specialise in a business area of their choice. The degree also offers a pathway for direct entry to a higher degree by research.

Master of Business (Accounting)
In a world of increasing accountability and the globalisation of accounting standards, professionals with the highest levels of qualifications are highly sought after. Accounting is fundamental to any organisation, and many executives working at senior levels hold accounting qualifications. Accountants must possess sound numerical and analytical skills, along with strong communication and people skills. This program is designed to provide students with not only professional competence, but also a portfolio of intellectual skills and attributes that will enhance their careers.

Master of Business (Accounting) and Master of Business Law
This double degree course has been designed for those working or intending to work in accounting who also wish to gain a postgraduate applied business law qualification.

Master of Business (Banking and Finance)
This course offers those who do not have a finance or business background the opportunity to gain the conceptual and managerial decision-making skills necessary for effective management in the continuously changing domestic and international finance markets. Upon successful completion of the course graduates may satisfy the educational requirements for senior associate membership of the Financial Services Institute of Australasian (FINSA) and membership of The Finance and Treasury Association at the Certified Finance and Treasury Professional level.

Master of Business (Science and Technology)
Science is a major driver of economic growth and development. Australia and other countries in the Asia-Pacific region are leaders in scientific research but fall behind in converting research discoveries into economic wealth. This specialisation aims to assist students with a science or technology background to commercialise leading edge medical, scientific and research projects. The course is offered in collaboration with the Monash Asia Pacific Centre for Science and Wealth Creation, which works with scientists, students and business people throughout the Asia-Pacific region on the transformation of science into wealth.

Master of Business Administration
Managers in today's knowledge economy need to be adaptable and flexible, and must possess not only core managerial skills but also high-level capabilities in a range of specialist areas. The Monash MBA more than meets these strategic business needs. It is consistently placed amongst the top MBA programs in Australia and internationally and is currently ranked third in the world in the personal development and educational experience category in the most recent Economist Intelligence Unit rankings. Supported by the University's international focus, its excellence in education, research and management, diversity, innovation and engagement with all communities, the Monash MBA truly prepares the business professional for the 21st century.
Master of Business and Master of Professional Accounting

The double degree is intended to provide students the opportunity to gain knowledge and skills in accounting, and to specialise in a second area of business of specific interest to them while also gaining an understanding of the broad range of contemporary business topics and their relevance to the business environment. Students also have the opportunity to participate in a unique suite of units that build skills and knowledge in personal development and corporate social responsibility, to increase their employment opportunities in public practice and industry.

4402 2 years FT Caulfield Applicants must have completed an Australian bachelor degree or an equivalent qualification in a non-accounting discipline, or an Executive Certificate awarded by the Faculty of Business and Economics and achieved a Weighted Average Mark (WAM) of 60 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 34,000 A

Master of Business Economics

Analysing and assessing the economic impact of policies and regulations on private and government enterprises is critical to strategic business decision-making in a wide range of industries, both in Australia and internationally. This degree provides a rigorous and theoretical grounding in the discipline of economics and its application to government and business decision-making. Monash students develop an extended knowledge of the general area of economic analysis in the global economy with particular attention to business strategy, project evaluation, pricing and risk, economic policy, regulation and competition policy. Students also develop analytical and technical skills to assist in problem-solving in the workplace, and develop communication and interpersonal skills with special attention to the needs of business and government agencies.

3842 1.5 years FT Caulfield Applicants must have completed an Australian bachelor degree or an equivalent qualification with a major in economics and a Weighted Average Mark (WAM) of 60 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 33,000 A

Master of Business Law

This course is designed to provide theoretical and practical knowledge in business law and to develop an understanding of and an ability to analyse a wide range of legal problems arising in the practice of business law. It particularly focuses on current legal issues in today's business world in order to prepare students for the growing range of opportunities in legal compliance. The program has been designed to link with other postgraduate programs, which enables students to complete up to half of their units from an extensive range of graduate units offered by the Faculty of Law within the Master of Commercial Law.

3159 1 year FT Caulfield, China Applicants must have completed an Australian bachelor degree or an equivalent qualification, or an Executive Certificate awarded by the Faculty of Business and Economics and achieved a Weighted Average Mark (WAM) of 60 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 33,000 A

Master of Diplomacy and Trade

The ability to evaluate key trends in foreign and trade policy requires a detailed understanding of the modern international system. This course aims to contribute to the development of private and public sector managers engaged in international trade, diplomatic staff, workers in international organisations and non-government organisations (NGOs) and other professionals interested in these areas. It provides high-level training in international business, diplomacy, economics, international law and environmental law policies, and contemporary international politics within an Australian context.

2643 1.5 years FT Caulfield Applicants must have completed an Australian bachelor degree or an equivalent qualification with a major in economics and a Weighted Average Mark (WAM) of 60 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 33,000 A

Master of Human Resource Management

Human resource management is the study of managing people within the employer and employee relationship. The Master’s course provides current and aspiring managers with the opportunity to develop specialist knowledge and expertise in human resource management, with an emphasis on strategic issues.

2099 1.5 years FT Caulfield Applicants must have completed an Australian bachelor degree or an equivalent qualification or an Executive Certificate awarded by the Faculty of Business and Economics and achieved a Weighted Average Mark (WAM) of 55 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 33,000 A

Master of International Business

This Master's course offers the opportunity to undertake an academically rigorous and professionally relevant program of study in contemporary international business issues. Knowledge gained from the course will provide graduates with the skills to lead companies through the internationalisation process. Students develop the capacity for high-level analysis of international and trans-national investment, trade, and management strategy in the context of globalisation, and acquire key skills in communication and negotiation across business cultures.

2088 1.5 years FT Malaysia, Caulfield Applicants must have completed an Australian bachelor degree or an equivalent qualification or an Executive Certificate awarded by the Faculty of Business and Economics and achieved a Weighted Average Mark (WAM) of 55 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 33,000 A

Master of International Business and Master of European and International Studies

This double master’s degree provides knowledge and skills in international business, with specific focus on the European Union and the significance of this organisation in the world. Students will gain a broad knowledge of international business issues, and the skills to provide leadership in the international arena, while also acquiring a broad and deep understanding of the institutional framework and policy-making processes of the European Union. The course comprises eleven core units and five electives taken over two years of full-time study, or part-time equivalent.

4411 2 years FT Caulfield Applicants must have completed an Australian bachelor degree or an equivalent qualification and achieved a Weighted Average Mark (WAM) of 60 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) Second Semester (July) 33,000 A
Master of Management
Exponential growth in new technologies, intense global competition and the elimination of industry boundaries has increased the external and internal challenges currently faced by managers. This course focuses on flexibility and agility at an individual and organisational level. It does so by exploring the fundamentals of individual, group and organisational behaviour and performance, organisational dynamics, and the importance of self-awareness, learning and self-management.

Master of Marketing
The early career marketing course (3802) is for students with a marketing qualification wanting to enhance their career opportunities and go on to advanced marketing. The career professionals course (2276) is for experienced business practitioners who want to strengthen their career opportunities by enhancing their marketing knowledge and skills. The Master of Marketing online (3810) is for experienced business practitioners who prefer the flexibility of online delivery. This course is not available to international students. Each course consists of six unique core units, and six electives. Two of the six graduate-level electives may be drawn from any faculty.

Master of Professional Accounting
Monash trained accountants are in great demand and working across a variety of industries. Graduates are renowned for possessing sound numerical and analytical skills along with strong communication and people skills. Monash is committed to ensuring that the program provides not only professional competence, but also a portfolio of intellectual skills and attributes that will enhance students’ careers.

Master of Professional Accounting (Advanced)
The course is designed to provide both practical and theoretical knowledge and skills in accounting. It enables students to satisfy the educational requirements of the accounting professional bodies in Australia.

Master of Professional Accounting and Master of Business Law
This course is accredited by CPA Australia, the National Institute of Accountants, and The Institute of Chartered Accountants in Australia. It is designed to provide students with knowledge and skills in accounting and rigorous theoretical and practical knowledge in business law to enhance employment opportunities for graduates. Students develop the ability to identify problems, to synthesise, analyse, summarise and classify data and qualitative information, to evaluate and weigh evidence, arguments and ethics, to apply specialist skills and knowledge to global business issues, and to work out solutions to simulated business cases and problems.

Master of Public Policy and Management
Continuous improvement and reform are recurring themes for governments around the world. This course focuses on understanding changing expectations about government, changing modes of delivering public services, and the changing skills needed by effective leaders and managers. Graduates will understand and apply relevant theories and concepts; develop skills to define and resolve issues in public policy and management; and blend theory and practice by working throughout the course on a wide range of practical issues.

Postgraduate Diploma in Business and Commerce
The flexibility of Monash degrees offers students the chance to study courses in order to enhance their careers and gain expert business and commerce knowledge, while at the same time achieving access to higher research award programs.

Postgraduate Diploma in Economics and Commerce
This course is designed for students who wish to undertake a higher degree by research but do not have the research background to meet the admission requirements. Students develop the skills needed to plan and undertake rigorous research, and the ability to effectively communicate research findings.
Doctor of Philosophy
A PhD enables a student to complete extensive, independent research under the supervision of an expert academic. For many students this program is the first chance to make a major contribution to research in a field of business and economics of their choosing. The sheer scale of Monash University’s research capabilities and the breadth of specialist expertise within the Faculty of Business and Economics offers research students opportunities across the full range of applied business and policy disciplines.

0029 4 years FT Berwick, Caulfield, Clayton, Gippsland, Malaysia, Peninsula

Applicants need to have completed a bachelor’s degree requiring at least four years of full-time study, and which normally includes a research component in the fourth year, leading to an honours degree class I or class IIA level, or a course leading to a master’s preliminary qualification at a level rated as equivalent to an honours class I or IIA degree, or a master’s degree that entails work, normally including a significant research component, at least equivalent to an honours degree (a ‘significant research component’ in a master’s degree will vary from discipline to discipline). It is normally expected that a grade of HIIA has been obtained for the research thesis or project. Where ungraded, examiners’ reports will be taken into account, or qualifications which, in the opinion of the committee, are deemed equivalent.

Master of Business (Honours)
This program is a pathway for high achieving accounting, banking and finance coursework master’s students to articulate into the university’s higher degrees by research program. The MBus(Hons) comprises four research units and a research dissertation, equivalent to a further four units. The coursework master’s program and the MBus(Hons) are designed to be completed in two and a half years of full-time study.

4416 2.5 years FT Caulfield

Applicants must have completed an Australian bachelor degree or an equivalent qualification with a major in Accounting or Finance or Risk Management and a Weighted Average Mark (WAM) of 70 per cent or an equivalent GPA as determined by the faculty. Applicants will be ranked and selected based on their entire academic record.

First Semester (February) 34,000 C

Master of Philosophy
The Master of Philosophy allows candidates to develop in-depth knowledge, expertise and skills through the application of research to business problems and issues. Students gain experience in the design and implementation of research and make a contribution to an existing body of knowledge by applying, clarifying or interpreting that knowledge. Monash University has formally adopted a commitment to scholarly research that includes the aim to be known globally for delivering high quality research that leads business and economic theory and practice. The Monash Faculty of Business and Economics has received international recognition for its high quality teaching, research and corporate links, including accreditation by the European Quality Improvement System (EQUIS).

3194 2 years FT Berwick, Caulfield, Clayton, Gippsland, Malaysia, Peninsula

Applicants need to have completed a first-class or upper-second class bachelor’s degree requiring at least four years of full-time study including a research component in the fourth year, or completed a course leading to a master’s preliminary qualification at a level rated as equivalent to a first-class or upper-second class honours degree, or qualifications, which in the opinion of the committee, are equivalent or a satisfactory substitute.

First Semester (February) Second Semester (July) 25,100 K

English language level: Please see page 58–59 for detailed requirements.
At a glance

- The Faculty of Education represents an intellectually-diverse research community, offering a range of perspectives, methodologies and flexible approaches to research practice.
- Our research is directed towards enhancing learning across a range of fields including counselling, education, leadership, and psychology.
- We have a distinguished record of developing and preparing some of the best and brightest teachers and educators, with graduate employment rates among the highest in the Group of Eight universities.
- Students can choose from a range of postgraduate courses including Early Childhood, Primary and Secondary teaching, TESOL, Mathematics and Science education, Gifted education, ICT education, Organisational Leadership, Counselling and Psychology.

Monash Education Research Community (MERC)

Established in 1992, MERC is an active network of research students and staff, and is open to all researchers in the faculty. MERC supports the idea that researchers develop best when their intellectual, academic and social needs are addressed through engagement in a supportive research community.

MERC organises seminars, conferences and social events to:
- facilitate interaction between staff and students
- foster attitudes and actions that contribute to an active and inclusive research culture
- share information relevant to research activities
- support the student experience with ongoing orientation and by ensuring that their needs are met by the faculty
- provide a forum for researchers for ongoing discussion about specific aspects of research processes
- encourage involvement in a supportive learning community.

Professional recognition

Our programs are recognised by:
- Australian Counselling Association (ACA)
- Australian Psychology Accreditation Council (APAC)
- Singapore Association for Counselling (SAC)
- Australian Children’s Education and Care Quality Authority (ACECQA)
- Victorian Institute of Teaching (VIT).

Devi Sukawati
Master of Education (specialising in Early Childhood)

“I have found the course very inspiring especially the focus on current trends in early childhood education. The course has led me to view early childhood education from different perspectives and has sharpened my thinking and analytical skills.

I chose Monash because of its global reputation and its membership in the Group of Eight universities.

I was a pre-school teacher in my home country of Indonesia – and I am confident that this course will strengthen my employability when I return.

The lecturers in the course are very committed and are willing to spend their time helping students in both academic and language matters. The course prepares students to be leaders in the field of education.”

<td>Recognised degree or equivalent diploma. *English language requirements: <a href="http://www.education.monash.edu.au/students/prospective/englishrequirements">www.education.monash.edu.au/students/prospective/englishrequirements</a> This course is designed to develop students' theoretical and practical knowledge in the area of early childhood teaching. Students form a broad conceptual understanding in the field of education and actively participate in traditional class work and off-campus teaching placements. The emphasis is on underpinning theories in early childhood teaching and the development of a strong understanding of the theories of child development. The course highlights the range of early childhood services and the social context of early childhood education. Students explore the importance of being flexible and responsive to the needs of young children and their families. It also addresses the relationship between service provision and the families of young children and develops an understanding of the ethical requirements of early childhood teachers and the practical application of these requirements. Students also gain valuable classroom experience by undertaking a minimum of 55 days of satisfactory teaching placements in a range of early childhood settings. Graduates of this ACECQA approved course are recognised by the Victorian Government as qualified to teach in licensed early childhood settings in Victoria.</td>

| **Master of Teaching (Primary)** | 4203 | 2 years FT | Berwick, Gippsland, Peninsula | Recognised degree or equivalent diploma. *English language requirements: [www.education.monash.edu.au/students/prospective/englishrequirements](http://www.education.monash.edu.au/students/prospective/englishrequirements) This course prepares graduates from a range of disciplines for a career as a primary school teacher. Students build on strengths developed in their undergraduate degree and will learn how to plan and deliver educational programs for primary school children. In addition to coursework units, students will undertake a minimum of 60 days of satisfactory professional placement where they gain valuable classroom teaching experience. Students will be eligible to seek registration with the appropriate authorities to teach in primary schools in Victoria. Graduates wishing to teach interstate or overseas are advised to check registration requirements with local authorities. | First Semester (February) | 20,750 | E |

| **Master of Teaching (Secondary)** | 4201 | 2 years FT* | Berwick, Clayton | Recognised degree or equivalent diploma from disciplines that qualify for two single specialist teaching areas or an approved double specialism. For information on specialist teaching areas prerequisites please visit: [www.education.monash.edu.au/units](http://www.education.monash.edu.au/units). *English language requirements: [www.education.monash.edu.au/students/prospective/englishrequirements](http://www.education.monash.edu.au/students/prospective/englishrequirements) This course prepares graduates for teaching in secondary schools and builds on strengths acquired in their undergraduate degree. It combines academic studies about the foundations of education, with two specialist teaching areas that will ultimately be what you are qualified to teach in secondary schools. Specialist teaching areas are based on your undergraduate studies. Generally you must have studied that discipline at university level for at least two years, and then complete the education units related to each specialization. Students also gain valuable classroom experience by undertaking a minimum of 60 days of satisfactory teaching placements in their specialist teaching areas. Graduates will be eligible to seek registration with the appropriate authorities to teach in Victorian secondary schools, and related teaching services, in two specialist teaching areas. Graduates wishing to teach interstate or overseas are advised to check registration requirements with local authorities. | First Semester (February)# | 20,750 | E |

| **Graduate Diploma of Education (Primary)** | 0341 | 1 year FT | Gippsland, Peninsula | A recognised degree or equivalent diploma. *English language requirements: [www.education.monash.edu.au/students/prospective/englishrequirements](http://www.education.monash.edu.au/students/prospective/englishrequirements) This is an intensive course where you will undertake more than the standard annual load of 48 credit points in one calendar year. Please consult Monash Course Finder for further information. [www.monash.edu/study/coursefinder](http://www.monash.edu/study/coursefinder). | First Semester (February) | 20,750 | E |
### Coursework degrees

**Master in Applied Linguistics for Language Teachers**

The increasing influence of globalisation has created strong demand for language skills among students who aspire to work in business, education, media and politics. This course seeks to further the understanding of applied linguistics for secondary and tertiary language teachers, especially in its relation to second and foreign language acquisition and language teaching. Two streams are available for students to select from: Stream A: Teaching Asian languages (Japanese, Korean, Chinese, Indonesian or other) or Stream B: Teaching English as a second/foreign language (TESOL).

**Master in Counselling**

This is an innovative skill-based program suited to professional people with an interest in counselling. The program provides a professional qualification and real-life counselling experience for people who may not be practising as psychologists or social workers. The Master in Counselling attracts people from a variety of professions such as human resources, health, social welfare and education. Specific program objectives are: to provide students with advanced knowledge about major counselling approaches, to provide training in counselling practice and to introduce ethical and professional issues relating to the counselling profession. An integral component of the program is a supervised professional placement including contact and non-contact hours. Placements offer valuable professional experience and the opportunity for students to make contacts in the field of counselling.

**Master of Education**

Education is a broad and evolving field which has a significant impact on society. The Monash Master of Education includes a range of specialisations to suit the career and individual aspirations of people interested in and passionate about education. Students explore the relationship between research and practice and are encouraged to critically analyse issues of specific interest to them, as well as wider, more general debates. This program is an excellent choice for teachers and educators, educational administrators, managers and policy makers, and others involved in learning and development. Whether you are working within the private or public sector, or in the wider educational community, master’s programs have the flexibility and breadth to accommodate your needs.

Postgraduate Diploma of Psychology

This program provides an Australian Psychology Accreditation Council (APAC) accredited fourth year qualification in Psychology. Classified as the equivalent of an honours program by the University, the content is designed for those wishing to pursue more advanced postgraduate training at master’s or doctoral level, and for those wishing to undertake supervised psychological practice after completion. This program is only offered on-campus and is for graduates who hold a degree with an APAC-accredited major in psychology. It offers advanced study and research training in psychology and an introduction to developmental psychology, counselling, psychological assessment and intervention, and ethical and professional issues in psychological practice.

Master of Psychology (Counselling)

Counselling psychologists specialise in providing psychological services. They work with individuals, couples, families, groups and organisations, using a broad range of evidence-based psychotherapies and therapeutic skills. They assist in areas such as personal wellbeing, relationships, work, recreation and health. This Australian Psychology Accreditation Council (APAC) accredited program will qualify graduates to register as a psychologist with the Psychology Board of Australia (PBA). Graduates will meet most requirements for membership of the College of Counselling Psychologists of the Australian Psychological Society (APS). The program prepares graduates to practise in a range of settings including psychological clinics, community centres, schools, tertiary institutions, hospitals, private practices, industry and health-oriented facilities.

Master of Psychology (Educational and Developmental)

Educational and developmental psychologists focus on how people develop and learn throughout their lifetime. They work in many different settings with individuals, families, groups and organisations. They also help varying titles such as school psychologist, guidance officer, and child and adolescent counsellor. Educational and developmental psychologists also conduct psychological and educational assessments and instructional planning for exceptional children, adolescents and adults.

This Australian Psychology Accreditation Council (APAC) accredited program will qualify graduates as a psychologist with the Psychology Board of Australia (PBA). Graduates will meet most requirements for membership of the College of Educational and Developmental Psychologists of the Australian Psychological Society (APS). The program prepares graduates to practice in a range of settings including primary and secondary schools, health and welfare services, care facilities, and within business and corporate environments.

English language level: Please see page 58–59 for detailed requirements.

### Research degrees

#### Master of Education (coursework/thesis)

Today’s educators are expected to be lifelong learners, able to operate in the global flow of the knowledge economy where established routines and boundaries are often challenged. Monash researchers investigate new learning spaces and transitions in education, training and work, and the increasingly diverse work of educators, teachers, managers, and organisational leaders. This program comprises coursework units and a research thesis of 20,000 to 25,000 words. It provides the opportunity to undertake research that can apply directly or indirectly to the work environment. It is particularly suitable for those who have research interests but who have not previously carried out a major research project and would like to eventually progress to doctoral studies in education.

#### Master of Education (thesis only)

Monash education research degrees are designed to allow students to develop and implement a major research project on a topic of personal interest, within the aim of contributing to the improvement of professional teaching practices. This course is a thesis-only research degree which requires candidates to carry out an independent study which is reported in a 30 to 40,000 word thesis. It is particularly suitable for those who have research interests but who have not previously carried out a major research project and would like to eventually progress to doctoral studies in education. Students conduct a study that is substantial but smaller in scope than a PhD.

#### Doctor of Philosophy

Monash is committed to supporting and promoting high quality research, and has built a reputation for conducting research with significant impact both in Australia and overseas. The Faculty of Education values research as one of its core responsibilities and is committed to supporting students who wish to enter the field of educational research. The PhD is a supervised program designed to allow a student to conceptualise and implement a major research project on a topic of personal interest. Candidates are expected to make a significant contribution to human knowledge and theory. That knowledge can lead to the improvement of professional teaching practice by extending understanding, expertise and skills of students through the application of research to pressing educational problems and issues.

At a glance

Monash Engineering is a leading research faculty with an exceptional national and international reputation.

Research strengths: The faculty boasts more than a dozen research institutes and centres and cross-institutional centres focused on key technologies.

Engineering provides a range of facilities and support services for postgraduate students, including a dedicated science and technology library and spacious work environments with 24-hour access to computer laboratories.

The New Horizons initiative is a platform for excellence in future manufacturing research and teaching. Scheduled to open in 2013, New Horizons aims to transform manufacturing in areas such as biomedicine, transport, aerospace and mineral processing.

Research excellence

The Monash Wind Tunnel is capable of creating winds in excess of 180km/h. A collaborative partnership between Monash University, the Australian Institute of Sport (AIS), and Cycling Australia has enabled the Australian men’s pursuit team and coaches to analyse rider-by-rider aerodynamic interaction in the Monash wind tunnel, in preparation for the 2012 Olympics.

Monash Vision Group (MVG) brings together engineering, computer scientists and medical researchers from Monash University and Alfred Health and industry partners Grey Innovation and MiniFAB, with all partners dedicated to developing and manufacturing a direct to brain bionic eye ready for first patient tests by 2014.

Monash University and the Indian Institute of Technology in Mumbai (IITB) have a joint-venture research academy. Doctoral students undertake research projects and receive a dual PhD degree from both Monash University and IITB.

Professional development

Engineering PhD graduates are highly sought after in research and development, strategic planning and senior management roles.

Postgraduate coursework programs allow engineers to upgrade their skills or seek higher qualifications for targeted career advancement. Monash works with industry partners to provide training in the latest technical advancements and to offer well-rounded professional development programs.

Richelle Lyndon
PhD

Richelle's current research explores the potential of Metal Organic Frameworks in reducing carbon emissions and contributing to a more efficient, economical and environmentally friendly gas separation process.

Prior to her research, Richelle completed a Bachelor of Biotechnology with honours specialising in chemistry at Monash University. Richelle’s dedication has been rewarded by the receipt of the Engineering Vacation Scholarship (2009), Monash University Jubilee Honours Scholarship 2010, Australian Postgraduate Award Scholarship 2011 and CSIRO Top-Up Scholarship (2011).

“The best thing about research is you constantly learn new things, encounter new challenges, improve your problem solving skills and meet new people. The challenging part is to find a solution when you run into experimental problems. However, the outcome is rewarding.”

### Master of Engineering Science (Research)

Monash Engineering research is at the forefront in developing the technologies of the future, such as nano-structuring and nano-manufacturing, bioengineering technology, aerospace technology, fluid dynamics, engineering alloys, geotechnical engineering, sustainable transport, materials characterisation, polymer engineering, intelligent robotics, railway engineering, power electronics and sustainable water.

### Doctor of Philosophy

The PhD program in the Faculty of Engineering may be undertaken in the principal areas of research offered by the faculty, including chemical engineering, civil engineering, electrical and computer systems engineering, materials engineering, mechanical engineering, aerospace engineering and biological engineering. Monash Engineering supports research students with state-of-the-art laboratories and research infrastructure, while also giving them access to supervisors with excellent reputations in their chosen fields.

Project management leaders

Our Master of Business Information Systems degree allows you to specialise in project management. Staff with excellent project management skills are essential for the survival of an organisation. Companies need to adapt as changes occur at a rapid rate, due to shorter product life cycles, accelerated development of sophisticated information systems, and an increasingly competitive market. Additionally, project management paves the way to future leadership roles. We deliver courses that are innovative and relevant to the changing needs of both students and employers. Project management units can also be selected as electives while completing either the Master of Applied Information Technology, Master of Information Technology or any other postgraduate degree.

---

Sindy Madrid
Master of Business Information Systems

Sindy structured her degree to provide a theoretical framework to her practical experience in the field of business intelligence. While studying at Monash, she also worked as a CRM Manager and a Business Intelligence Architect with the subjects she chose helping to make her a specialist in her field.

Research degrees

Doctor of Philosophy

Information Technology research at Monash has a multi-disciplinary, multi-campus and multi-national approach, providing research students with a unique capacity to reach out further and deeper than at any other institution in Australia. The faculty has six research centres which provide the focus for internationally recognised research strengths in intelligent systems, distributed systems and software engineering, organisational and social informatics, business intelligence and multimedia computing. Areas for research cover the whole IT spectrum from engineering to social science. The award of the PhD degree is generally accepted as showing that the candidate is capable of carrying out independent research.

<table>

<tbody>
<tr>
<td>0190</td>
<td>4 years FT</td>
<td>Berwick, Caulfield, Clayton, Gippsland, Malaysia</td>
<td>The minimum qualifications for admission to PhD candidate are: (a) a bachelor’s degree requiring at least four years of full-time study and normally including a research component in the fourth year, leading to an honours degree at first or upper second class level (II or HIA); or (b) a course leading to a master’s preliminary qualification at a level rated by the relevant school and faculty as equivalent to a first or upper second class honours degree; or (c) a master’s degree that comprises a significant research component, at least equivalent to (a) above. The degree of Doctor of Philosophy (PhD) at Monash signifies that the holder has completed a course of postgraduate training in research under proper academic supervision, and has submitted a thesis that the examiners have declared to be a significant contribution to knowledge, and that demonstrates the candidate’s capacity to carry out independent research.</td>
</tr>
</tbody>
</table>

Master of Information Technology (Research)

Information technology is found in every aspect of today’s world. The diversity of real-world IT applications is reflected in the range of research options available to Monash research students. The Master of Information Technology (Research) can be undertaken in more than 30 specialised areas.

- Our postgraduate teaching centre is located at the city-based Monash University Law Chambers.
- Monash Law School is dynamic and internationally recognised for its commitment to excellence in legal education, training and research.
- Contemporary, specialised postgraduate courses allow you to advance your expertise in a chosen legal area, giving your career a professional edge.
- Teaching by leading academics, experienced legal practitioners and international experts enriches your educational experience and ensures programs remain relevant in the changing global climate.
- Our postgraduate programs produce graduates with transferable knowledge and skills who are adept at meeting the unique challenges of today’s competitive workplace.

Master of Laws (Juris Doctor)
The Monash Master of Laws (Juris Doctor) is a graduate entry degree that provides graduates with academic qualifications to apply to practise law. Small class sizes and our city location attract passionate and dedicated individuals who want to work as lawyers. The course focuses on the knowledge, legal skills and professional ethics that may be expected of legal practitioners.

Due to their diverse professional experiences and their high level of commitment to legal practice, graduates are highly sought after and valued by employers. The Monash JD opens up a wide variety of career pathways to our students, and our graduates have found employment in a range of rich and diverse career avenues, within the legal profession and beyond.

Human rights leaders
The Monash Law Faculty has developed a worldwide reputation for its dedicated research centres, including the Castan Centre for Human Rights Law. Cultivating the next generation of human rights leaders, the Centre brings together human rights scholars, practitioners and advocates to promote and protect human rights – through research, publications, consultancies and advocacy. The human rights specialisation allows graduates from all disciplines to choose from an extensive range of units, covering topics of domestic and international relevance including indigenous and children’s rights to issues relating to terrorism, migration and encroachments on privacy. You can focus on human rights issues confronting governments, international bodies, individuals and corporations, and critically engage in and debate these issues while being taught by some of the most highly respected human rights academics in Australia. Each year the Castan Centre facilitates student internships to a variety of organisations dedicated to the protection and advancement of human rights offering students valuable first-hand experience.

Suruswadee Jaismuwan
Thai student, Master of Laws (Intellectual Property) 2011

“There were many reasons why I enjoyed studying for my master’s degree at Monash. The location of Chambers in the CBD was very convenient, the research and language skills advisers were very helpful and the lecturers were all very knowledgeable but ‘down to earth’ and enthusiastic. Staff were always very helpful and responded to my emails promptly too! The assessment system equipped me with great skills to undertake research academically, and to advise clients professionally – a perfect combination that I can use in the future. I enjoyed my stay in Melbourne – both the studies and my free time. Studying at the Monash Law School gave me the chance to enjoy both aspects of my life.”

Monash Law School is currently undertaking a course review. Programs may change.
## Coursework degrees

### Graduate Diploma in Law

For law graduates and those from disciplines other than law, this course aims to provide further education in the legal profession to update skills and specialise in specific areas of the law. It may also contribute to continuing legal education and professional development. In terms of course structure, teaching methods, class times and venues, this course is designed with the interests of part-time students particularly in mind. The flexible nature of this course will allow you to complete the course in as little as six months full-time (with credit) or two years part-time. Graduate diploma students can choose to articulate into any of our other postgraduate law degrees subject to faculty approval.

### Graduate Diploma in Law (Human Rights)

For law graduates and those from disciplines other than law, this course allows you to choose from an extensive range of units covering topics across the domestic and international arenas. Covering a wide range of traditional and emerging topics, from indigenous and children’s rights to issues relating to terrorism, migration and encroachments on privacy, this specialisation enables students to focus on topical human rights issues confronting governments, international bodies, individuals and corporations and allows students to critically engage in and debate these issues. It is particularly relevant for those who wish to pursue a career in human rights law and related work. This specialised degree provides in-depth theoretical and practical knowledge of the international human rights legal framework, the organisations that promote and protect it and the mechanisms and processes by which it is enforced. Students will also develop high-level skills in interpreting and analysing primary and secondary human rights materials, including treaties, treaty body decisions, domestic jurisprudence and scholarly commentary. Some of the most highly respected human rights academics in the country as well as highly qualified visiting experts teach into the program. Our courses, along with the faculty’s support of the Castan Centre for Human Rights Law, have put Monash University at the forefront of the movement to create a human rights law culture in Australia.

Standards Board for Patent and Trade Marks Attorneys to teach all units which are accredited by the Professional property law and address advanced issues, including local and international developments of laws relating to the protection of intellectual property rights. Monash Law School teaches all units which are accredited by the Professional Standards Board for Patent and Trade Marks Attorneys to satisfy the knowledge requirements for registration as a Patent Attorney or Trade Marks Attorney.

Graduate Diploma in Law (Intellectual Property)
For law graduates and those from disciplines other than law.
The Intellectual Property specialisation is ideal for those wanting to gain accreditation as a trade mark or patent attorney, and for those wanting to advance their professional expertise in the ever-evolving area of intellectual property law. New developments and advances in media, communications and the virtual world require that the law and the ramifications of emerging technology be understood and applied in a practical setting. Students will obtain grounding in the fundamental principles of intellectual property law and address advanced issues, including local and international developments of laws relating to the protection of intellectual property rights. Monash Law School teaches all units which are accredited by the Professional Standards Board for Patent and Trade Marks Attorneys to satisfy the knowledge requirements for registration as a Patent Attorney or Trade Marks Attorney.

Graduate Diploma in Law (International and Comparative Law)
For law graduates and those from disciplines other than law.
The International and Comparative Law specialisation provides students with an advanced legal knowledge across a broad spectrum of legal issues with international significance. These include public international law, international human rights and humanitarian law, international criminal law and justice, international commercial and comparative law and international trade and financial law. This specialisation suits lawyers whose practice exposes them to any aspect of international or comparative law, whether this be in the commercial, criminal or human rights law areas. It also suits lawyers and those from disciplines other than law who work in, or have an interest in working in working in non-government organisations (NGOs), government and industry (domestically or internationally), who are interested in the impact of the international legal framework of their work. The specialisation carries a broad offering of units taught by Monash Law staff with international reputations in their areas, carefully chosen practitioners with considerable expertise and visiting international experts. In this way the International and Comparative Law specialisation is carefully constructed to provide an outstanding exposure to the theory and practice of international and comparative law.

Graduate Diploma in Law (Workplace and Employment Law)
For law graduates and those from disciplines other than law.
The Workplace and Employment Law specialisation provides students with a thorough grounding in labour law and is relevant to those working or aiming to work in this area. The topics covered in the diverse units include collective bargaining agreements, individual contracts, occupational health and safety, electronic workplace law, international human rights and discrimination. This specialisation aims to develop knowledge of workplace, employment, discrimination and human rights law, and address issues of globalisation and organisational change. For those from disciplines other than law working in law-related fields (industrial relations practitioners, human resource practitioners, industrial officers, management personnel etc.) this specialisation offers a formal course of training to gain an advanced level of knowledge in the global workforce.

Graduate Diploma in Local Government Law
For law graduates and those from disciplines other than law.
This course is designed in consultation with industry partners specifically for graduates from disciplines other than law. This course provides a thorough grounding in areas of local government law relevant to the needs of senior and middle managers in local government, as well as catering to the needs of graduates from disciplines other than law engaged in the local government sector. As the third level of government in our political system, councils and other local government authorities have responded to growing governmental and communal expectations of their rate through an expansion of functions and powers. Local government entities, as the providers of a number of community services, are increasingly called on to regulate and make sophisticated decisions about many issues facing the community.

<td>The Regulatory Studies specialisation is offered by the Faculty of Law in conjunction with the faculties of Arts, Business and Economics, Medicine, Nursing and Health Sciences, and Pharmacy and Pharmaceutical Sciences. It addresses the nature, extent and implications of the regulatory environment via a broad, cross-disciplinary approach. The study of regulation is a relatively new discipline which both links and transcends the boundaries between the disciplines of economics, law, politics, criminology, sociology, psychology, organisational theory, public administration and health. This unique specialisation provides practitioners and scholars with a core set of ideas, theories and skills to apply to their regulatory activities and manage regulatory challenges.</td>

Master of Laws (Juris Doctor)
For graduates from disciplines other than law
The Monash JD is a graduate entry law degree designed to teach the knowledge and skills required to practise law. It recognises the individual needs of non-law graduates who wish to study law and offers the transferrable skills and knowledge only a law degree from one of Australia's leading universities can provide. The course focuses on the knowledge, legal skills and professional ethics that may be expected of legal practitioners. The flexible nature of the Monash JD allows students to work while they study and tailor their workload to suit their professional and personal commitments. The Monash JD can be completed in just three years or two and a half years in accelerated mode. Students who wish to complete their JD in two and a half years must have a distinction average. Small seminar-style classes bring together passionate and dedicated individuals with diverse professional experiences in a stimulating and challenging environment.

Master of Laws (Workplace and Employment Law)
For law graduates
The Workplace and Employment Law specialisation provides law graduates with a thorough grounding in labour law and is relevant to those working or aiming to work in this area. The topics covered in the diverse units include collective bargaining agreements, individual contracts, occupational health and safety, electronic workplace law, international human rights and discrimination. This specialisation aims to develop knowledge of workplace employment, discrimination and human rights law, and address issues of globalisation and organisational change.

Master of Regulatory Studies
For law graduates and those from disciplines other than law
The Master of Regulatory Studies is offered by the Faculty of Law in conjunction with the faculties of Arts, Business and Economics, Medicine, Nursing and Health Sciences and the Pharmacy and Pharmaceutical Sciences at Monash University. It was specifically designed to address the nature, extent and implications of the regulatory environment in a broad, cross disciplinary approach. The study of regulation is a relatively new discipline which links and transcends the boundaries between economics, law, politics, criminology, sociology, psychology, organisational theory and public administration. This unique degree will provide practitioners and scholars with a core set of ideas, theories and skills to apply to their regulatory activities and manage regulatory challenges.

Research degrees

Doctor of Juridical Science
The Doctor of Juridical Science (SJD) is a professional doctorate program that enables students to complete a research thesis together with a selection of coursework units in a specific area of interest. This program is suited to legal professionals seeking to enhance their expertise through advanced coursework and research. The coursework units allow students to develop some expertise in the area in which they intend to pursue their research before commencing work on their thesis of 50,000 words.

Master of Philosophy

The Master of Philosophy in the Faculty of Law requires the completion of a major thesis of about 50,000 words in length, which may be undertaken in any area of research within the faculty. It is suitable for law or non-law graduates who wish to pursue a major scholarly research project. It is particularly suited to students seeking to undertake an interdisciplinary research project. It is expected that the thesis will meet a standard comparable to legal writings found in learned journals, and demonstrate the student’s ability to carry out independent research and to analyse and synthesise legal concepts.

Law graduates hold court

Monash University law graduates hold the majority of senior judicial positions in Victoria including the Chief Justice of the Supreme Court of Victoria, [The Hon. Marilyn Warren, AC](https://www.munich.de); The Chief Judge of the County Court, [His Honour Chief Judge Michael Rozenes AO, QC](https://www.munich.de), and [Ian Gray, Chief Magistrate of the Magistrates’ Court of Victoria](https://www.munich.de).
At a glance

The faculty’s commitment to the pursuit of excellence and innovation in both research and in teaching and learning is clear. It consistently receives the highest amount of funding from the Australian Government in recognition of teaching and learning performance of any health-related faculty at any university.

There is a strong emphasis on translating knowledge and expertise from the academic to the clinical. Graduates can pursue their professional ambitions within our faculty from day one through a focused degree.

Professional registration/ recognition

With a postgraduate research degree from the Faculty of Medicine, Nursing and Health Sciences, you’ll join researchers who are already making a difference in the fight against illness, injury and disease.

Our degrees are recognised by a range of leading medical organisations such as the Nursing and Midwifery Board of Australia, the Australian Psychology Accreditation Council, the Australian Institute of Radiography, the Australasian Sonographers Accreditation Registry and the Royal Australian College of General Practitioners.

Research excellence

Our researchers are continually recognised in competitive grant rounds of organisations such as the National Health and Medical Research Council (NHMRC), the Australian Research Council (ARC) and the Cancer Council and the National Heart Foundation. We win a significant proportion of awards for research, reflecting our strengths in areas such as neuroscience, foetal development, malaria and communication impairment. Our people, programs, platforms and a new precinct for biomedical sciences research at Clayton, plus a prominent presence at The Alfred (Alfred Medical Research and Education Precinct), Monash Medical Centre (Monash Health Research Precinct), a network of clinical schools at hospitals across Victoria, and at our own campuses at Peninsula, Gippsland, Caulfield and Malaysia means that we are able to translate a high volume of research into clinical outcomes. Monash is also the only Australian member of the prestigious M8 Alliance of academic health centres and medical universities.

Addie Wootten

Doctor of Psychology (Clinical Psychology)

When Addie Wootten came to Monash, she realised how big a difference she could make to those affected by prostate cancer. With the guidance of an inspiring doctoral supervisor, and the experience gained through various placements, internships, conferences and hours of discussion with doctors and nurses, Addie found her calling.

Today she is one of Australia’s leading psychologists working to support men with prostate cancer.

Master of Occupational and Environmental Health

Industry, government and communities are becoming increasingly concerned about the high human and economic impact of workplace injury and disease and the potential for industrial activity to affect the health of the community. Trained occupational health professionals and OHS managers are required to provide expert advice and to develop preventative programs to reduce the toll. This course is particularly suitable for medical practitioners, nurses, allied health personnel, scientists and occupational health and safety managers. The degree is recognised by the Australasian Faculty of Occupational Medicine and the Australian College of Occupational Health Nurses. Students may be eligible to exit from the Master with the Graduate Certificate in Occupational Health (0160).

Master of Public Health

This 12-unit course provides students with the full range of quantitative, analytical and communication skills necessary to work in the broad domain of public health. It especially focuses on developing skills in the quantitative methods of the population-based health sciences and their problem-solving application for primary care provision both in Australia and for developing countries. Students can exit with a Graduate Diploma or Graduate Certificate providing the approved selection of units is completed.

Master of Social Work (Qualifying)

The MSW (Qualifying) curriculum meets the Australian Association of Social Workers (AASW) requirements and builds on Monash Social Work areas of strength, especially in gender studies, sustainability, child well being and health. The degree includes considerable emphasis on community engagement and leadership, and provides opportunities to work with organisations to complete projects and research. The MSW (Qualifying) is a coursework degree with theoretical skills development and supervised professional practice units. The course provides opportunities for group-based research and integration of theory and practice. Theoretical content builds on knowledge acquired by graduates in previous higher education, while social work skills components and professional practice units introduce students to contemporary social work practice.

Research degrees

Doctor of Medicine (supervised)

The Doctor of Medicine (MD) is a research degree that may be undertaken in the Faculty of Medicine, Nursing and Health Sciences in any of the faculty’s principle research areas and strengths. Candidates in the MD (supervised) mode undertake a research project under the direct supervision of a member of the academic staff. The work undertaken as part of this research degree must constitute a significant contribution to the knowledge and understanding of a field of study of direct concern to the faculty, and must demonstrate the capacity of the candidate to carry out independent research.

Doctor of Philosophy

The Doctor of Philosophy (PhD) is a research degree that may be undertaken in the Faculty of Medicine, Nursing and Health Sciences in any of the faculty’s principle research areas and strengths. Candidates undertake a research project under the direct supervision of a member of the academic staff. The work undertaken as part of this research degree must constitute a significant contribution to the knowledge and understanding of a field of study of direct concern to the faculty, and must demonstrate the capacity of the candidate to carry out independent research.

Doctor of Psychology in Clinical Neuropsychology

The Doctor of Psychology in Clinical Neuropsychology (DPsych) is a research degree. Candidates undertake a research project under the direct supervision of a member of the academic staff. The discipline of clinical neuropsychology attempts to understand the basis of cognition, behaviour and emotion in the assessment of children and adults with neurological disorders. A feature of the Doctor of Psychology (DPsych) in Clinical Neuropsychology course is that training in clinical neuropsychology is extended through specialisation in a choice of areas, including rehabilitation, child and adolescent neuropsychology, geriatric neuropsychology, psychiatric neuropsychology and forensic psychology.
## Doctor of Psychology in Clinical Psychology
The Doctor of Psychology in Clinical Psychology (DPsych) is a research degree. Candidates undertake a research project under the direct supervision of a member of the academic staff. This course prepares psychologists for research in applied areas of psychology and to work as clinical psychologists in the assessment and treatment of adults and children with relatively severe emotional and/or behavioural disorders. A feature of the program is that training in clinical psychology is extended through coursework in a choice of areas, including child, adolescent and family psychology, forensic psychology, and health/medical psychology.

Master of Social Work (Research)

The Master of Social Work (Research) is a research degree. Candidates undertake a research project under the direct supervision of a member of the academic staff. The work undertaken as part of this research degree must constitute a significant contribution to the knowledge and understanding of a field of study of direct concern to the faculty, and must demonstrate the capacity of the candidate to carry out independent research. Specialist areas of research include casework, child abuse and protection, community health and services, corrections, ethnic welfare, family and children's courts, family intervention, family violence, policy development, poverty, residential care, women and social work, the welfare lobby, drug law reform, child abuse and the media, and aged care. The profession of social work aims to assist people to develop their full potential. Social workers help people with personal and social problems to access community resources and develop community support networks.

2698 2 years FT Caulfield, Clayton, Notting Hill

Applicants must hold a relevant bachelor's degree with honours 1, honours 2A or upper honours 2B (65%), in a relevant field, or a master's degree in a relevant field with an approved research component, or have other qualification or experience deemed equivalent or a satisfactory substitute by the faculty board.

Master of Surgery

The Master of Surgery is a research degree. Candidates undertake a research project under the direct supervision of a member of the academic staff. The work undertaken as part of this research degree must constitute a significant contribution to the knowledge and understanding of a field of study of direct concern to the faculty, and must demonstrate the capacity of the candidate to carry out independent research.

3443 1.5 years FT Alfred, Box Hill, Clayton, MMC

An applicant must have qualified not less than two years previously for the degrees of Bachelor of Medicine and Bachelor of Surgery (MBBS) or equivalent at Monash University or another university approved by the faculty board. An applicant must also intend to pursue a career in surgery or have applied for or been accepted into the Surgical Education and Training program of the Royal Australasian College of Surgeons or an equivalent surgical training program approved by the faculty board; or hold a Fellowship of the Royal Australasian College of Surgeons or equivalent higher surgical qualification as approved by the faculty board. In addition, an applicant must have been substantially engaged, since qualifying for the degree of Bachelor of Surgery or its equivalent, in the practice and study of surgery or scientific work relevant to the practice of surgery to the satisfaction of the faculty board.

English language level: Please see page 58–59 for detailed requirements.

Southbank – Victorian Institute of Forensic Medicine
SVI – St Vincent’s Hospital
WEHI – Walter and Eliza Hall Institute
Pharmacy and Pharmaceutical Sciences

www.pharm.monash.edu

Ranked first in Australia and sixth in the world for pharmacy and pharmacology by the 2012 QS World University Rankings by subject, Monash offers you the highest quality education.

At a glance

_Research success:_ Monash researchers make important contributions that bring real change to people’s lives across the globe, including drug development to combat influenza, malaria and cancer.

_Links with industry:_ The faculty is a major player in the Australian health care, pharmaceutical and biomedical community. Strong links exist with the pharmacy profession and other research groups.

_World-class facilities:_ Students have access to innovative learning technology, flexible delivery modes, modern laboratories, first-rate research equipment and an extensive specialist library.

Research excellence

Research students completing a higher degree by research with the Faculty of Pharmacy and Pharmaceutical Sciences have the opportunity to work with world-class researchers in the Monash Institute of Pharmaceutical Science (MIPS) or the Centre for Medicine Use and Safety (CMUS).

MIPS is the largest and most experienced group of pharmaceutical scientists in Australia. In the recent Excellence in Research for Australia assessment, Monash scored top marks for its research in the fields of pharmacology and pharmaceutical sciences, and nanotechnology, as well as 4/5 for medicinal and biomolecular chemistry.

The Centre for Medicine Use and Safety (CMUS) is focused on delivering innovative research to optimise community health nationally and internationally. Researchers are working collaboratively with other health care professionals and researchers to develop, implement and evaluate new models and systems of health care practice, with the ultimate goal of optimising the safe and effective use of medicine.

Dr Timothy Morgan
Co-founder and Executive Director Lachesis Biosciences, Australia
PhD thesis title: Transdermal drug delivery with topical aerosols
Tim’s PhD work with faculty staff directly led to the development of the patent for the ‘spray on’ drug delivery technology that was commercialised through Acrux Limited. This led to the US Food and Drug Administration approving Evamist®, a transdermal estradiol spray for the treatment of menopause symptoms, in 2007. In 2005, Tim left Acrux to apply his entrepreneurial drive to a new venture, Lachesis Biosciences, an online preventive healthcare service that helps people take action aligned with their lifestyle. His current research focus is the convergence of healthcare and information technology and how it can assist people to stay healthy and live longer. Tim has several granted patents, numerous pending patent applications, peer-reviewed journal papers and a book chapter.

At a glance

**Leader in science:** A clear focus and enviable reputation for research achievements in biology, chemistry, earth sciences, mathematics and physics.

**World-class programs:** Outstanding postgraduate research programs that are competitive with the best national and international equivalents.

**Conducive to learning:** World-class facilities and support services in a broad range of research areas. Monash is committed to providing a stimulating and supportive professional environment for its postgraduate students.

**International reputation:** Home to many internationally respected scientists.

A formidable combination

The Faculty of Science has more than 400 research academics, fellows and students. Our expertise, tradition and achievements are formidable and make a significant contribution to the advancement of science within Australia. We have five schools (Biological Sciences, Chemistry, Geosciences, Mathematical Sciences and Physics) located at the heart of the Clayton science and technology precinct and two externally-located schools in Gippsland (School of Applied Science and Engineering) and Sunway, Malaysia (School of Science), with more regional and global interests.

We host four cross-disciplinary research centres supported by state-of-the-art equipment, including the Australian Synchrotron, and have strong research links with the CSIRO, local businesses and industry, and a range of government authorities.

Generous scholarship opportunities

The Faculty of Science Dean's Postgraduate Research Scholarship Scheme provides funding support to all eligible, newly commencing students in a higher degree by research (Doctor of Philosophy, Master of Philosophy, Master of Science). There are two scholarship types available within this scheme:

- Faculty of Science Dean’s Postgraduate Research Scholarship – provides a living allowance matching the Australian Postgraduate Award.
- Faculty of Science Dean’s International Postgraduate Research Scholarship – covers the cost of international student fees and Overseas Student Health Cover.

We also offer a range of research funding and support schemes for early career researchers, postdoctoral academics and fellows, and women in research.

---

Alana Sharp
PhD

Alana Sharp took advantage of her Monash experience by travelling to Costa Rica to help in sea turtle conservation efforts. This hands-on experience taught her to trust her knowledge and experience, practically applying what she learned in the classroom. She is now completing her PhD on vertebrate functional morphology using computational biology and reverse engineering.

Alana Sharp
PhD
Doctor of Philosophy

Scientists are willing to imagine an alternative future. They are passionate about new knowledge and dedicated to making a difference in their area of specialisation.

Monash PhD research students have access to internationally renowned research centres and are able to develop close professional relationships with local industry and government.

Monash academics are recognised experts in fields as diverse as environmental and green chemistry, astrophysics and general relativity, synchrotron science, statistics, atmospheric science, and X-ray physics and imaging.

Monash University is introducing a range of discipline specific programs comprised of the equivalent of three months of research skills training and/or coursework to be completed at various stages throughout the PhD. These programs are intended to assist you conduct the research that will be completed as part of your degree.

The programs will be introduced to the PhD over a three-year period commencing in 2013. If it is identified that an appropriate program has been established for your PhD it becomes a mandatory part of your degree.

Master of Philosophy

This master’s by research degree is available as an alternative to the faculty-based Master of Science (by research) degree and is administered by the Monash Institute of Graduate Research.

The Master of Philosophy permits students to show independence of thought and demonstrate their ability to carry out research in their chosen discipline.

Monash offers expert supervision across scientific disciplines including applied sciences, biological sciences, chemistry, geosciences, mathematical sciences, and physics.

Master of Science

As the world’s most international research-intensive university, Monash encourages students to conduct research and professional engagement within an international context.

The Master of Science permits students to show independence of thought and demonstrate their ability to carry out research in their chosen discipline.

Monash offers expert supervision across scientific disciplines including applied sciences, biological sciences, chemistry, geosciences, mathematical sciences, and physics.

English language level: Please see page 58–59 for detailed requirements.
Admission and application

How to apply

For postgraduate degrees by COURSEWORK

Graduate diplomas, postgraduate diplomas and master’s by coursework.

Before you apply

Use the Monash Course Finder to check:
- the entry requirements and prerequisites
- extra documentation required
- for example, details of relevant work experience
- fees
- closing dates
- when courses start

When should you apply?

Apply as early as possible. Some courses have application closing dates two to four months prior to the start of the course, while others have quotas.

Aim to have your application received by International Recruitment at least two to four months prior to the course start date. This allows time for your application to be processed and can help to ensure that you secure a place if your preferred course has limited places. Applying early also gives you time to get your student visas, which can take up to six months for some nationalities and countries.

Step 1: Apply

Complete the postgraduate application form located at the back of this course guide, or apply online at www.monash.edu/study/international/apply/postgraduate.html. You may also apply though a Monash-registered agent. Some agents may charge a fee for additional services so please ask what these costs are before you make an appointment. To find a Monash-registered Agent near you please visit www.msr.monash.edu/monash_agents

If you apply on the application form make sure all sections are completed and that the declaration is signed and dated before you send the application.

Documents you need to supply

Your application will need to include certified* supporting documents such as:
- details and evidence of your previous academic qualifications, such as academic transcripts, graduation certificates and grading systems. You can ask your current or previous education provider to send copies of academic transcripts, graduation certificates and grading systems direct to International Recruitment Services in an envelope sealed by the institution.
- if these documents are in a language other than English, you will need to supply certified* translated copies. Monash prefers NAATI-qualified translators (www.naati.com.au)
- if you are applying or credit for prior learning, you will need to provide documents such as, official transcripts or results from previous studies, copies of subject outlines. Please note that credits transferred may affect the duration of your course, which could affect you visas.
- if the course requires previous work experience, you will need to submit details of your work history.

Send your completed application and certified documents* together with a $A100 application fee (payable by bank draft, telegraphic transfer or credit card) to the address on the form:

* Individuals authorised to certify documents are listed on the application form. All documents submitted remain the property of Monash University.

Checking the status of your application

Once your application is received and entered into our database Monash will send an acknowledgement email to you and your agent. This email will contain a Monash Student ID. Use this ID to check the status of your application on the website at www.monash.edu/study/international/apply/application-track.html

Alternatively, if you have applied online, login with your account ID and password at applicant.connect.monash.edu.au/connect

Step 2: Your application is assessed

We assess your application against the minimum age, English, and academic entry requirements. If your application is successful, you will receive a full International Student Course Agreement (ISCA). We will email this to you and to your agent, if you have one. Instructions will be supplied on how to accept your offer, including the fees and Overseas Student Health Cover (OSHC) you need to pay.

If we are not able to make you a full ISCA immediately, you may receive a conditional ISCA. A conditional ISCA means you must submit more information and meet the requirements specified in the ISCA. Usually, the information we need is documentation (e.g. official final transcript, graduation certificate or an English test results, etc) to see if you meet the specific entry requirements for the course for which you have applied. We will explain what is needed in the ISCA. Please submit the documentation to us as soon as possible.

If you are not successful for your first preference, International Recruitment Services will assess you for the next preference listed on your application form.

Step 3: Accept your offer

- To accept your offer, follow the instructions in your ISCA. You must complete, sign and return only Part B of your ISCA with payment and a photocopy of the personal details page of your passport to secure your place at Monash University.
- Your payment should include OSHC for the duration of your visa for yourself and any family members accompanying you to Australia.

Please note:
- Monash University does not accept cash
- Dishonoured cheques may incur additional bank fees
- You may need to notify your bank of large deductions
- Bank drafts or bank cheques will need to be mailed or delivered in-person to International Recruitment Services. Please ensure you include your full name and Monash Student ID on the back of either the bank draft or bank cheque.

Step 4: We send you an Electronic Confirmation of Enrolment (eCOE)

An electronic Confirmation of Enrolment (eCOE) will be emailed to you or your agent when you have accepted your full ISCA or packaged ISCA (with no academic conditions specified). You need the eCOE to apply for a student visa

Step 5: Arrange a Student Visa

Monash University is approved by the Australian Government for Streamlined Visa Processing (SVP) for Master degrees by coursework.

This will make the process of applying to Monash University and getting a visa more straightforward. You will need an eCOE from Monash University to apply for a student visa.

Visit the Government website for the Department of Immigration and Citizenship for information about studying in Australia www.immi.gov.au/students

To be eligible for Streamlined Visa Processing (SVP), you are advised not to commence the visa application process until you have been issued with your electronic confirmation of enrolment (eCoE).

If not eligible for SVP, your visa subclass and country assessment level will determine the visa application form you need to complete and the documents that are required to process your student visa (Assessment levels are available at www.immi.gov.au/allforms/pdf/assessmentlevels.pdf

Please note:
- Monash University does not accept cash
- Dishonoured cheques may incur additional bank fees
- You may need to notify your bank of large deductions
- Bank drafts or bank cheques will need to be mailed or delivered in-person to International Recruitment Services. Please ensure you include your full name and Monash Student ID on the back of either the bank draft or bank cheque.

Step 4: We send you an Electronic Confirmation of Enrolment (eCOE)

An electronic Confirmation of Enrolment (eCOE) will be emailed to you or your agent when you have accepted your full ISCA or packaged ISCA (with no academic conditions specified). You need the eCOE to apply for a student visa

Step 5: Arrange a Student Visa

Monash University is approved by the Australian Government for Streamlined Visa Processing (SVP) for Master degrees by coursework.

This will make the process of applying to Monash University and getting a visa more straightforward. You will need an eCOE from Monash University to apply for a student visa.

Visit the Government website for the Department of Immigration and Citizenship for information about studying in Australia www.immi.gov.au/students

To be eligible for Streamlined Visa Processing (SVP), you are advised not to commence the visa application process until you have been issued with your electronic confirmation of enrolment (eCoE).

If not eligible for SVP, your visa subclass and country assessment level will determine the visa application form you need to complete and the documents that are required to process your student visa (Assessment levels are available at www.immi.gov.au/allforms/pdf/assessmentlevels.pdf

Please note:
- Monash University does not accept cash
- Dishonoured cheques may incur additional bank fees
- You may need to notify your bank of large deductions
- Bank drafts or bank cheques will need to be mailed or delivered in-person to International Recruitment Services. Please ensure you include your full name and Monash Student ID on the back of either the bank draft or bank cheque.

Step 4: We send you an Electronic Confirmation of Enrolment (eCOE)

An electronic Confirmation of Enrolment (eCOE) will be emailed to you or your agent when you have accepted your full ISCA or packaged ISCA (with no academic conditions specified). You need the eCOE to apply for a student visa

Step 5: Arrange a Student Visa

Monash University is approved by the Australian Government for Streamlined Visa Processing (SVP) for Master degrees by coursework.

This will make the process of applying to Monash University and getting a visa more straightforward. You will need an eCOE from Monash University to apply for a student visa.

Visit the Government website for the Department of Immigration and Citizenship for information about studying in Australia www.immi.gov.au/students

To be eligible for Streamlined Visa Processing (SVP), you are advised not to commence the visa application process until you have been issued with your electronic confirmation of enrolment (eCoE).

If not eligible for SVP, your visa subclass and country assessment level will determine the visa application form you need to complete and the documents that are required to process your student visa (Assessment levels are available at www.immi.gov.au/allforms/pdf/assessmentlevels.pdf

Please note:
- Monash University does not accept cash
- Dishonoured cheques may incur additional bank fees
- You may need to notify your bank of large deductions
- Bank drafts or bank cheques will need to be mailed or delivered in-person to International Recruitment Services. Please ensure you include your full name and Monash Student ID on the back of either the bank draft or bank cheque.
Step 6: Enrolment pack
Enrolment is the main step in starting your Monash studies. At enrolment you can meet a faculty course adviser, ask questions and discuss your unit selection and course structure.

After you have received your eCOE, you will receive an enrolment package that includes:
- a welcome letter
- a copy of Passport to Monash, your complete guide to living in Australia and studying at Monash University
- an "authority to enrol" which you must bring with you on the date of your enrolment.

Step 7: Plan your arrival
Make your own travel arrangements aiming to arrive in Melbourne at least 14 days prior to orientation. This will make it easier for you to settle in and prepare for the start of classes.

If you wish to use our airport reception service and temporary accommodation service, you should complete and return the request form available at www.monash.edu/study/international/preparing/reception

Step 8: Start your studies
Enrolment takes place two weeks prior to the start of teaching, and students must arrive at the university in time for enrolment. Please note that some courses do not accept late enrolments after the enrolment period.

On arrival at Monash University, you will be assisted through the process of enrolment. Further details about the enrolment process are available at www.monash.edu/study/international/arriving/enrolment.html

There will be an orientation program to help you familiarise yourself with the university and your new surroundings.

For postgraduate degrees by RESEARCH
PhD, Master of Philosophy, Master’s by Research, Professional Doctorate.

When should I apply?
Research degree-only applications may be submitted at any time of the year, but restrictions may apply to your course commencement date if you must complete any coursework as part of the degree. Applications for the University’s two research scholarships rounds close on 31 October and 31 May each year. Scholarship applicants will be notified of the outcome of their application approximately six weeks after the closing date.

Step 1: Check your eligibility
Monash University offers a large range of research degrees. Once you know the degree you are interested in, check your eligibility for the course and a scholarship. www.monash.edu/migr/apply/eligibility

Our scholarship rounds are very competitive. Most scholarships require the equivalent of a first-class honours degree from Monash University. You’re assessed for all scholarships and grants for which you are eligible when you apply.

Step 2: Find a supervisor and submit a research proposal
Investigate your many research options at Monash and identify potential supervisors and faculties. Discuss your research proposal with your chosen supervisor and faculty. Read our step-by-step guide to applying online. Prepare the documents you need to submit with your application. www.monash.edu/migr/apply

You will be required to submit a research proposal as part of your application and should start developing this as soon as you have some idea of your research topic. The type of information that should be included in an initial proposal includes:
- What is the topic area?
- What has motivated your interest in this particular area?
- What field or fields of knowledge does it engage?

What are the key questions to be explored?
- What are the aims of the project?
- What works or materials will be involved?
- What methodologies are involved?
- What are the proposed outcomes of the research?

Prospective candidates are encouraged to seek further information about the research expertise of academic staff through the websites and brochures of research centres, faculties, schools and departments.

Step 3: Apply online
Prospective students apply for entry into a research degree online at: www.monash.edu/migr/apply

If you need assistance completing the form please check the guide to completing the online form, www.monash.edu/migr/apply/application/guide/index.html

You apply for our research degrees and scholarships online using the same application form. Our scholarships are awarded on merit and highly competitive.

Step 4: Your application is assessed
Once you have submitted your application it will be assessed and approved by the Monash University Institute of Graduate Research, the faculty and academic unit at which you will be enrolled. The duration of this process can vary but should take no longer than six weeks. If your application is successful, you will be sent an offer pack including:
- an Offer Letter
- an acceptance form and instructions
- visa information
- registration and enrolment details.

Step 5: Accept your offer
You need to read your offer letter and offer pack carefully to know how to accept your offer and enrol in your course.

International students need to pay their Overseas Student Health Cover and a course-fee deposit before we provide an electronic Confirmation of Enrolment (eCOE), which you need for your student visa application.

Step 6: Arrange a Student Visa
Monash University is approved by the Australian Government for Streamlined Visa Processing (SVP). This will make the process of getting a visa more straightforward. As a postgraduate applicant you are eligible for SVP. Submit your eCOE with your visa application and you will be assessed by the Australian Department of Immigration and Citizenship according to Assessment Level 1 visa criteria for:
- English-language proficiency
- Financial capacity
- Genuine temporary entrant requirement
- Health and character criteria
- Arrangements for Overseas Student Health Cover.

Step 7: Plan your arrival
Make your own travel arrangements aiming to arrive in Melbourne at least 14 days prior to orientation. This will make it easier for you to settle in and prepare for the start of classes.

If you wish to use our airport reception service and temporary accommodation service, you should complete and return the request form available at www.monash.edu/study/international/preparing/reception

Step 8: Start your studies
The Monash Institute of Graduate Research runs orientation activities conducted each semester. The services, facilities and resources available to research students differ markedly from those available to other students, so attendance is strongly recommended for all, even if you have studied at Monash previously.
English Language Requirements

Different postgraduate courses offered at Monash University have different levels of English language requirements which are outlined in the following categories:

<table>
<thead>
<tr>
<th>Coursework</th>
<th>IELTS</th>
<th>TOEFL</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Academic IELTS overall 6.5 with no individual band score less than 6.0</td>
<td>Paper based TOEFL total score of 580 with a TWE of 4.5 or internet-based TOEFL total score of 90 with 22 in Writing and no section lower than 20.</td>
</tr>
<tr>
<td>B</td>
<td>Academic IELTS overall 6.5 with a score of 6.5 in Listening and Reading and a score of 8.0 in Speaking and Writing.</td>
<td>Paper based TOEFL total score of 580 with a TWE of 4.5 or internet-based TOEFL total score of 90 with 22 in Writing and no section lower than 20.</td>
</tr>
<tr>
<td>C</td>
<td>Academic IELTS overall 7.0 with no individual band score less than 6.5.</td>
<td>Paper based TOEFL total score of 600 with a TWE of 5.0 or internet-based TOEFL total score of 100 with 24 in Writing and no section lower than 20.</td>
</tr>
<tr>
<td>D</td>
<td>Academic IELTS overall 7.0 with a score of 6.5 in Listening and Reading and a score of 7.0 in Speaking and Writing.</td>
<td>Internet-based TOEFL total score of 100 with 25 in Speaking and Writing and 22 in Listening and Reading.</td>
</tr>
<tr>
<td>E</td>
<td>Academic IELTS overall 7.5 with a score of 7.0 in Reading and Writing and a score of 8.0 in Listening and Speaking.</td>
<td>Internet-based TOEFL total score of 105 with a score of 24 in Reading, 26 in Speaking, 27 in Writing and 28 in Listening.</td>
</tr>
<tr>
<td>F</td>
<td>Academic IELTS overall 7.0 with no individual band score less than 7.0.</td>
<td>Category F English requirements can only be satisfied with submission of an IELTS test with the above scores. No other English tests are acceptable.</td>
</tr>
<tr>
<td>G</td>
<td>Academic IELTS overall 7.0 with no individual band scores less than 7.0.</td>
<td>Paper based TOEFL total score of 600 with a TWE of 5.0 or internet-based TOEFL total score of 102 with at least 24 in Writing and no section lower than 20.</td>
</tr>
<tr>
<td>H</td>
<td>Academic IELTS overall 7.0 with a score of 7.0 in Reading and a score of 6.5 in Speaking, Listening and Speaking.</td>
<td>Paper based TOEFL total score of 600 with a TWE of 5.0 or internet-based TOEFL total score of 100 with 24 in Writing and no section lower than 20.</td>
</tr>
</tbody>
</table>

Where studies have been conducted entirely in English and involving formal assessment of written work in a country where English is the official language, Evidence in the form of a letter or certificate issued by the university Registrar’s office will need to be provided. Studies must be completed within the five-year period prior to application.
Research students

All research students must apply using the online form at www.monash.edu/study/research

Application forms to study at the Sunway campus (Malaysia) are available from www.monash.edu.my/research

For applications to Sunway campus, (Malaysia) a fee of MYR100 is payable to Monash University Malaysia.

Don’t meet the English language requirements?
If you have not yet satisfied any of the above English language requirements, the most effective pathway is to undertake an English course at the Monash University English Language Centre. For more information, visit www.monash.edu/englishcentre

Fees
To study at Monash University you must pay tuition fees to the University. Tuition fees vary for different courses.

Fee details
Indicative tuition fees are detailed in the Course Tables of this guide. However, please check Monash course finder and www.monash.edu.au/fees.html.

The tuition fees quoted are for 48 credit points unless otherwise stated in the Course Tables and only applicable to a course commencing in the year stated in the table. Tuition fees for course commencement in the coming years will be different. For students who have commenced, Monash University reserves the right to adjust annual tuition fees for future years of your course. However, Monash University undertakes that any adjustment factor for those continuing students will not exceed 6% per annum. Any adjustment will be applied on the first day of January each year for teaching periods with a census date thereafter.

Healthcare fees
It is an Australian Government visa regulation for international students studying on a student visa to have compulsory Overseas Student Health Cover (OSHC) for the duration of their stay in Australia. Monash University requires all commencing international students to purchase health cover that will last for the duration of their visa. An electronic Confirmation of Enrolment (eCoE) will not be issued until one of the following is met:

- the OSHC payment has been received (along with payment of fee deposit)
- proof has been submitted that visa length OSHC has been purchased with an approved Australian OSHC provider of the student’s choice
- approved documentation has been submitted for exemption from payment of OSHC.

For more information, visit www.monash.edu.au/fees/resources/policy/overseasstudent-healthcover.html

Discount for a brother or sister
Students who have one or more siblings enrolled in a Monash University full-fee award course at the same time may be entitled to a discount on their annual tuition fees.

For more information, visit www.monash.edu/fees/discountsrerefunds/family-discount.html

Who should use this application form
All international students who wish to apply to study postgraduate coursework degrees on campus (including graduate diplomas, postgraduate diplomas and master’s by coursework degrees).

Complete coursework applications should be sent to:
International Recruitment Services
871 Dandenong Road
Caulfield East, Victoria 3145
Australia.

TOEFL
Complete this form if you are applying for a postgraduate course at Monash University as an international fee-paying student. An application fee must be paid when you submit this form. Please complete all sections of the form clearly and in pen. Do not fill in this form if you are applying for a research degree. The correct form is available at www.monash.edu/migr/apply

Section A: Your application

Are you a citizen of Australia or New Zealand, a Permanent Resident of Australia? If yes, do not fill in this form, instead refer to: www.adm.monash.edu.au/admissions/applyonline-instruct.html

Do you have a Monash student ID? (please tick): [ ] No [ ] Yes (please state): [ ]

Are you a currently enrolled Monash student? (please tick): [ ] No [ ] Yes

Section B: Personal details

We will contact you by email, post or telephone. To avoid delays in your application, it is important you legibly complete ALL of your details, including your email address. Your name and date of birth should match those in your passport. If you apply through an agent, please ensure all of your details are also provided. These should be different from those of the agent.

Family name: [ ]

Given name(s): [ ]

Date of birth: [ ]

Gender (please tick): [ ] Male [ ] Female

Postal Address in home country: [ ]

Country: [ ]

Telephone: [ ]

Mobile phone: [ ]

Fax: [ ]

Email (you must give a current and valid email address): [ ]

Monash Registered Agents

If you apply through an agent, please ensure that your agent is registered with Monash University or you may experience delays in your application. For details of agents in your country, go to: www.msr.monash.edu.au/monash_agents.

Agency name: [ ]

Country: [ ]

Name of agent: [ ]

Telephone: [ ]

Email: [ ]

Registered Agent’s stamp: [ ]
Section C: Course preferences

Refer to the Monash Course Finder at the following weblink: monash.edu/study/coursefinder for the latest details of course codes, titles, campuses, fees and start dates.

Choose three courses you would like to study and list them in order of preference. Check the entry requirements and prerequisite subjects for each to see if you qualify. If you meet the requirements of your first choice, you will not be assessed for your second and third choices.

1. Course title: ____________________________
   Course code: __________
   Commencement year: ______
   Semester: __________
   Campus code: ________

2. Course title: ____________________________
   Course code: __________
   Commencement year: ______
   Semester: __________
   Campus code: ________

3. Course title: ____________________________
   Course code: __________
   Commencement year: ______
   Semester: __________
   Campus code: ________

Citizenship and Other Information:

Country of citizenship (as stated in passport): ____________________________

You must submit a copy of the personal details page of your passport, or if you do not have a passport, then a copy of your birth certificate

Country of birth: ____________________________

Have you applied for OR hold any type of Australian visa?: [ ] No [ ] Yes
   If yes, please specify visa type: ____________________________
   Expiry date (if applicable): __________

Have you been refused an entry visa to any country?: [ ] No [ ] Yes (If yes, please attach evidence)

Have you breached any visa conditions in any country.: [ ] No [ ] Yes (If yes, please explain)

Do you have any medical or health issues that may prevent you from obtaining your visa in Australia?: [ ] No [ ] Yes (If yes, please explain)

Have you been issued a protection visa in any country to date?: [ ] No [ ] Yes (If yes, please attach evidence)

Have you been convicted of any crime or offence in any country?: [ ] No [ ] Yes (If yes, please provide ALL relevant detail.)

Section D: Students with disabilities

Do you have a disability, impairment or long term-medical condition that may affect your studies?: [ ] No [ ] Yes

If yes, Monash will require medical documentation from a relevant treating professional outlining the impact of your condition on your ability to meet the academic demands in the university environment. Disclosure of disability is treated confidentially and will not be used to disadvantage you. The Disability Liaison Unit at Monash may contact you to discuss the services available. For more information visit: monash.edu/equity-diversity/disability

Section E: English language proficiency

You must provide proof of your English proficiency to the required standard of your chosen course. There are a number of ways to satisfy these requirements. For details visit: www.adm.monash.edu.au/admissions/postgrad/pg-english-requirements.html Two of the main pathways are:

English as the language of instruction

You have studied in an institution where English is the language of instruction and assessment for the entire institution. Applicants are required to provide evidence from the institution on certified letterhead and signed by the institution’s registrar.

Or

IELTS/TOEFL/Pearsons Test of English

Attach original results or documents (request results to be sent to Monash by testing centres). Please note that only results achieved within two years of the course commencement date will be considered. If you have not yet sat an IELTS/TOEFL/Pearsons Test of English exam, please indicate when you will sit one.

Note: The Australian Government sometimes requires proof of English proficiency for visa applications. You should ensure that any test you take meets those requirements also. Visit: www.immi.gov.au/students

[ ] I will sit/have sat an English language proficiency test

[ ] IELTS [ ] TOEFL [ ] Pearsons test of English

Date test taken: __________

[ ] I will apply for a Monash University English Language Centre course in Section F below

If you do not meet the course English requirements, you may be eligible for an English Language Bridging Program. If so, Monash will indicate this in your letter of offer.
Section F: Application for additional English studies and university preparation

Test your English!

Find out your level of English with our free online test*. The test helps you to estimate how many weeks of English you might need to undertake in order to meet the English language requirement for the postgraduate course you wish to apply for.

The free online English test is available at the following website: www.monashcollege.edu.au/online-test.

This section is an application to the Monash University English Language Centre. Additional tuition fees apply for these courses. For details of fees, courses and start dates, visit: www.monash.edu/englishcentre

* This test is to be used as a guide only and is not a replacement for the IELTS test or meeting the English language requirement for the course you have applied for.

Course title: 
Start date:     End date:     Number of weeks (minimum five):   

Section G: Academic qualifications and other required documents

Check the entry requirements on the Monash Course Finder at the following website: monash.edu/study/coursefinder for any additional requirements and prerequisites required for the course you are applying for.

Include details of your previous academic qualifications. Include dates of commencement and completion, or if you are yet to finish study, your intended completion date. Certified copies of academic qualifications must be attached to an application including academic transcripts, graduation certificates and grading systems.* If the qualifications are in a language other than English, please also supply certified translated copies. Monash prefers NAATI-qualified translators. For more information on NAATI translators, please see www.naati.com.au.

Certification of documents

All documents including academic transcripts, graduation certificates, grading scales, work reference letters etc submitted to International Recruitment Services must be properly certified on every page of the required documents.

Please note that all applicants have the option to ask their current or previous education institution to send copies of their academic transcripts, graduation certificate and grading systems direct to International Recruitment Services in an envelope sealed by the institution.

Who can certify documents?

Documents submitted within Australia: Solicitor, Pharmacist, Justice of the Peace, Member of the police force, Doctor, School principal, Bank manager, Chartered accountant

Documents submitted outside Australia: Monash University registered agent, Monash staff member, Solicitor, Commissioner for declarations, Government official, Public notary, University staff (Head of Department, Dean, or Registrar)

What does the certifier need to do?

Approved certifier (from list above) must sight the applicant’s original academic transcripts, graduation certificates and grading systems etc and check that the copies are true and unchanged copies of the original documents.

The certifier must then certify EVERY PAGE of the documentation as follows:

1. Certifier must write a statement acknowledging or apply a stamp that shows they have sighted the original documents using words such as “certified true copy of the original” OR “original sighted”

2. Certifier must sign the document

3. Certifier must write their full name

4. Certifier must apply the agent/organisation stamp

5. Certifier must provide written or stamped notification of their position title within the agency/organisation (eg counsellor, student advisor etc)

6. Certifier must date the document

Please be advised that we only accept faxed or emailed certified documents sent to us via Monash Registered Agents. If you are not applying via a Monash Registered Agent and you are a direct applicant, you will be required to send your original certified documents by mail to our office. Please ensure you follow the guidelines mentioned above for proper certification.

If you have a Chinese qualification, documents submitted for assessment must be:

_ Certified by the Notary Public office. Notary certification must include a certificate stating that translations of all documents in English are authentic and in conformity with the original in Chinese. *OR*

_ Your transcript/s, degree certificate and graduation certificate/s can be sent to Monash, International Recruitment Services in a sealed envelope directly from your University. *OR*

_ Photocopies of original notarised documents can be submitted by a registered agent. Documents must be certified by the agent. Information regarding registered agents can be viewed at: www.msr.monash.edu/monash_agents

Monash University reserves the right to refuse documentation on the grounds of incorrect certification and translation.

* Documents submitted with your application remain the property of Monash University.

Post-secondary qualification (tertiary studies). Please list your MOST RECENT qualifications first:

Name of qualification: 
Institution:     Country:     
Date commenced:     Date completed:     

Name of qualification: 
Institution:     Country:     
Date commenced:     Date completed:     

Are you transferring within the first six months of your principal course in Australia? Your principal course is the main course of study to be undertaken where you have been issued a student visa for multiple courses of study. The principal course would normally be the final course of study.

☐ No    ☐ Yes If yes, please attach a release letter from your current provider.
Section H: Additional requirements

Many postgraduate courses have additional requirements you must submit in support of your application. Failure to include this information will delay processing of your application. Please refer to the below and ensure you provide the following information:

1. If you have completed your final year of study more than six months ago from the completion date of your final qualification to the Monash course commencement period you are applying for please provide detailed account of activities undertaken since then below or attach a Curriculum Vitae:

   
   
   
   

2. Please refer to the Monash Course Finder http://monash.edu/study/coursefinder/ for the course you have applied for to view an additional documentation required (eg statement of purpose, curriculum vitae, work reference letters, folio, supplementary forms, additional faculty application forms etc) and submit these with your application.

3. If the course you have applied for requires work experience as a pre-requisite please provide a copy of your curriculum vitae AND work reference letters issued by your previous employer on original company letterhead stating your job title, the basis of employment (full-time/part-time), a precise description of duties performed, duration of your employment (including dates), and the full name, title and signature of the writer.

Section I: Credit transfer

Do you wish to apply for credit transfer/advanced standing from your previous studies?

☐ No
☐ Yes (If you have ticked yes, please provide the following):

1. Complete the Credit Transfer Application Form available at www.monash.edu/service-centre/assets/docs/forms/credit.pdf
2. Submit detailed course syllabus/unit outlines/curriculum for the units your are seeking credit exemptions for.

Further information may be requested from you if your previous course/institution has not been previously assessed by Monash University for credit evaluation assessment.

Section J: Scholarship/sponsorship information

Have you applied for a scholarship/sponsorship from an organisation external to Monash University to support your studies?

☐ No  ☐ Yes (please state the name of the external scholarship/sponsorship):

What is the status of your external scholarship/sponsorship application?

☐ Approved  ☐ Pending  ☐ Not approved

If the external scholarship/sponsorship has been approved please provide a copy of the official offer letter with this application.

Section K: Application fee payment

You can pay the A$100 application by credit card, money order or bank draft made out to Monash University.

Card type: ☐ Mastercard  ☐ Visa

Cardholder’s name: ____________________________

Credit card number: ____________________________

Credit card expiry date: ______/____/____

Cardholder’s signature: ____________________________

Credit card verification number: ________

Amount: $100.00

63
Section M: Privacy and student declaration

General privacy statement
The information collected on this form is used to assess your application for entry to a Monash University course. It is also used to create an enrolment record on the student database, to prepare a statistical analysis and to inform you about your course and other University courses/events. If you do not complete all the questions on this form, it may not be possible to process your application. Personal information may be collected from, or disclosed to, relevant bodies for the verification of your previous qualifications, and it may be disclosed to government agencies (eg DIAC), as required by legislation or pursuant to obligations under the ESOS Act 2000 and the 2007 National Code of Practice or for your visa application. Information may be shared with the registered agent you appoint to assist with your application for entry or visa processing. You have the right to access personal information that Monash University holds about you, subject to legislation, by contacting the Monash University privacy officer at privacyofficer@adm.monash.edu.au. Privacy legislation only applies to students who study in Australia.
Due to privacy regulations, we are unable to disclose information to any other third parties such as friends, relatives and parents.

Declaration
I warrant that the information on this form, or provided in support of my application, is correct, complete and up to date in every detail. I acknowledge that the provision of incorrect information or the withholding of relevant information relating to my application, including academic transcript/s, might invalidate my application and that the University may refuse to assess my application, withdraw an offer of a place or cancel my enrolment in consequence.
Should the University determine that I have submitted a false document, I consent to the University disclosing this information to other relevant tertiary institutions.
I consent to any educational institution at which I have previously been a student and/or my current or any past employer, providing Monash University with information which that institution or employer holds about me for the purpose of Monash verifying my grades and/or qualifications or experience.
I declare that I am a Genuine Temporary Entrant (GTE) and a Genuine Student and that I have read and understood conditions relating to these requirements as defined on the following website: www.immi.gov.au/students/_pdf/2011-genuine-temporary-entrant.pdf
I am aware of the estimated total course fees at Monash University and living costs for my stay in Australia. I understand that the total course fees do not cover the cost of books, materials, field trips or any additional cost related to my course, unless otherwise specified. I declare to have sufficient funds to support myself and my family unit members (if applicable) for the TOTAL period of my stay in Australia (including proposed course fees for myself and any school-age family members, Overseas Students Health Cover, living costs and travel costs, regardless of whether my dependants intend to accompany me in Australia).
I agree to abide by the statutes, regulations and policies of Monash University.

I have read and understood the above conditions and accept them fully.
Student’s signature: __________________________ Date: ____________

Please complete the following checklist before submitting

☐ A$100 application fee (non-refundable)
☐ Proof of English proficiency
☐ Certified copies of academic records/transcripts
☐ Additional information (check your course/s in the Admissions Table in this guide)
☐ Signed declaration
☐ If you are a DEEWR Endeavour Awards applicant, you must attach a copy of the email from DEEWR confirming your Application ID number
☐ If you are applying for an Australian Leadership Award (ALA), please attach a copy of the AusAID acknowledgement letter
☐ Copy of official scholarship/sponsorship offer letter
☐ Copy of personal details of passport or a copy of birth certificate.

MONASH University
According to *The New York Times*, the world’s top CEOs are more likely to hire Monash graduates.

In a recent study published in *The New York Times*, more than 200 CEOs from the world’s most successful companies rated Monash the top Australian university from which to hire graduates. So it’s no surprise our graduates enjoy one of the highest rates of employment in the country, making a Monash degree your first step toward reaching great heights.

*The New York Times (20 October 2011)*
